

WPC15 Motherboard

3.5" Fanless SBC w/Intel Atom
D2550 1.86GHz Processor, VGA,
LVDS, Dual Giga Ethernet, and
Mini-PCle Interface.

USER MANUAL Version 1.0

FCC Statement

This device complies with part 15 FCC rules. Operation is subject to the following two conditions :

- This device may not cause harmful interference.
- This device must accept any interference received including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a class "a" digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at him own expense.

Copyright Notice

No part of this document may be reproduced, copied, translated, or transmitted in any form or by any means, electronic or mechanical, for any purpose, without the prior written permission of the original manufacturer.

Trademark Acknowledgement

Brand and product names are trademarks or registered trademarks of their respective owners.

Disclaimer

We reserve the right to make changes, without notice, to any product, including circuits and/or software described or contained in this manual in order to improve design and/or performance. We assume no responsibility or liability for the use of the described product(s), conveys no license or title under any patent, copyright, or masks work rights to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified. Applications that are described in this manual are for illustration purposes only. We make no representation or warranty that such application will be suitable for the specified use without further testing or modification.

Warranty

We warrant that each of its products will be free from material and workmanship defects for a period of one year from the invoice date. If the customer discovers a defect, We will, at its option, repair or replace the defective product at no charge to the customer, provided it is returned during the warranty period of one year, with transportation charges prepaid. The returned product must be properly packaged in its original packaging to obtain warranty service.

If the serial number and the product shipping data differ by over 30 days, the in-warranty service will be made according to the shipping date. In the serial numbers the third and fourth two digits give the year of manufacture, and the fifth digit means the month (e. g., with A for October, B for November and C for December).

For example, the serial number 1W11Axxxxxxx means October of year 2011.

Packing List

Before using this Motherboard, please make sure that all the items listed below are present in your package :

- WPC15 Motherboard
- User Manual
- HDD SATA Cable
- User's Manual & Driver CD

If any of these items are missing or damaged, contact your distributor or sales representative immediately.

Customer Service

We provide service guide for any problem as follow steps : The first, contact with your distributor, sales representative, or our customer service center for technical support if you need additional assistance. You may have the following information ready before you call :

- Product serial number
- Peripheral attachments
- Software (OS, version, application software, etc.)
- Description of complete problem
- The exact wording of any error messages

In addition, free technical support is available from our engineers every business day. We are always ready to give advice on application requirements or specific information on the installation and operation of any of our products. Please do not hesitate to call or e-mail us.

Safety Precautions

◆ **Warning!**

Always completely disconnect the power cord from your chassis whenever you work with the hardware. Do not make connections while the power is on. Sensitive electronic components can be damaged by sudden power surges. Only experienced electronic personnel should open the PC chassis.

◆ **Caution!**

Always ground yourself to remove any static charge before touching the CPU card. Modern electronic devices are very sensitive to static electric charges. As a safety precaution, use a grounding wrist strap at all times. Place all electronic components in a static-dissipative surface or static-shielded bag when they are not in the chassis.

Safety and Warranty

1. Please read these safety instructions carefully.
2. Please keep this user's manual for later reference.
3. Please disconnect this equipment from any AC outlet before cleaning. Do not use liquid or spray detergents for cleaning. Use a damp cloth.
4. For pluggable equipment, the power outlet must be installed near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall could cause damage.
7. The openings on the enclosure are for air convection. Protect the equipment from overheating. **DO NOT COVER THE OPENINGS.**
8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient over-voltage.
12. Never pour any liquid into an opening. This could cause fire or electrical shock.
13. Never open the equipment. For safety reasons, only qualified service personnel should open the equipment.
14. If any of the following situations arises, get the equipment checked by service personnel:
 - A. The power cord or plug is damaged.
 - B. Liquid has penetrated into the equipment.
 - C. The equipment has been exposed to moisture.
 - D. The equipment does not work well, or you cannot get it to work according to the user's manual.
 - E. The equipment has been dropped and damaged.
 - F. The equipment has obvious signs of breakage.
15. Do not leave this equipment in an uncontrolled environment where the storage temperature is below -20° C (-4°F) or above 60° C (140° F). It may damage the equipment.

General Information

This chapter includes the WPC15 Motherboard background information.

Sections include:

- Introduction
- Feature
- Motherboard Specification
- Function Block
- Board Dimensions

Chapter 1 General Information

1.1 Introduction

The WPC15 SBC is integrated with Intel® NM10 express chipset, 17x17mm, and Atom D2550 Processor. Intel Atom Processor with 32nm low power design enables down to 50% less average power consumption and the chipset delivers up to 4x improvement in graphics performance and enables up to 50% higher data transfer bus speed rate.

In peripheral connectivity, WPC15 SBC features with Mini-PCIe I/O ports, one Serial ATA connectors, four Serial Port (One Connector; Three Pin Header) and Six Hi-Speed USB 2.0 connectors(Two Connector ; Four Pin Header) .Additionally, WPC15 SBC build-in a 12V DC-IN power adapter.

Thus, the WPC15 SBC is designed to satisfy most of the applications in the industrial computer market, such as Gaming, POS, KIOSK, Industrial Automation, and Programmable Control System. It is a compact design to meet the demanding performance requirements of today's business and industrial applications.

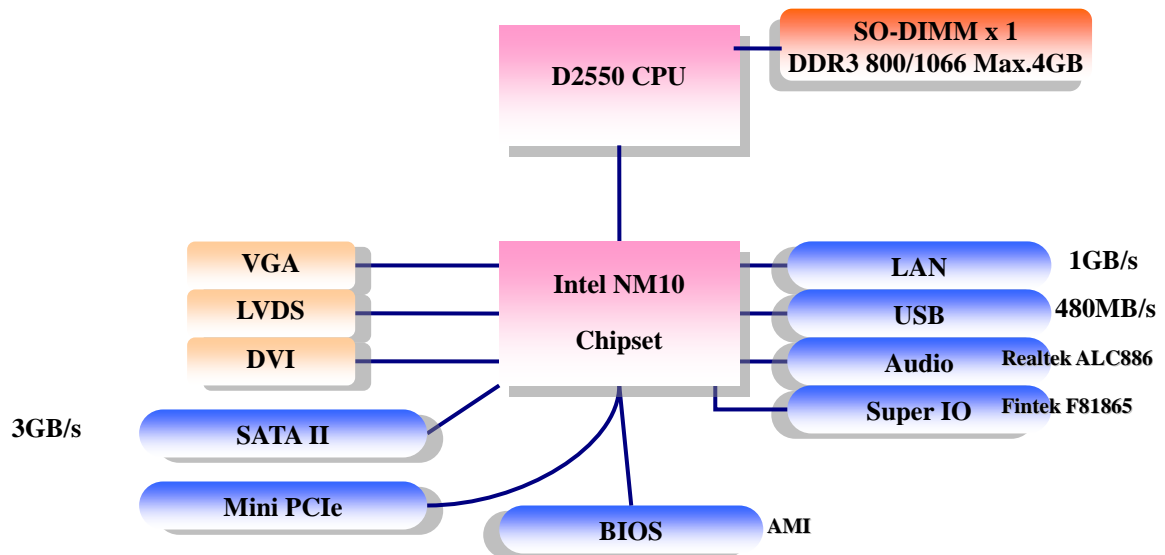

1.2 Feature

- 3.5-inch Form Factor (146mm x 102mm)
- Supports Intel® Atom D2550 1.86GHz processor
- System memory up to 4GB DDR3 800/1066, SO-DIMM
- Intel NM10 Chipset
- Intel® Graphic Accelerator 3650 Integrated Graphics Engine.
- Dual Broadcom BCM57780 GbE controller
- 2 x Mini PCIe(one for wireless, one for SATA SSD), 4 X COM, 6 x USB2.0, 1 x SATA, 8 x GPIO ports, 1 x DVI

1.3 Motherboard Specifications

CPU Type	Intel Atom Dual Core D2550 2.13GHz Processor
CPU Speed	1.86GHz
Chipset	Intel NM10
BIOS	AMI 4Mbit Flash
Graphic	Intel® Graphic Accelerator 3650 support DX10, OGL2.0
LCD interface	Single-channel 24 bit LVDS Up to 1440 x 900 @ 60Hz
Resolution	VGA mode : Up to 1920 x 1200 @ 60Hz DVI : 1920 x 1200 @ 60Hz
LAN	2 x Giga LAN (Broadcom BCM57780 GbE controller)
Memory Type	1 x SO-DIMM socket, supports up to 4GB DDR3 800/1066
Super I/O	Fintek F81865
Sound	Realtek ALC886 HD Audio Codec
USB	6 ports, USB 2.0 (2 x USB Connector, 4 x USB pin-header)
Edge Connectors	1 x DC-IN Jack (+12V) 1 x VGA out connector 2 x Gigabit LAN RJ-45 1 x RS232/422/485 1 x Dual USB stack connector
On Board Pin-Header Connectors	1 x SATA connector for SATAI/II 3.0 Gb/s 1 x 10pins pin-header for Front Panel(2x5) 1 x 8pins pin-header for 5V/12V external power 1 x 3pins pin-header for CPU Fan 1 x 2pins pin-header for 5V external power 1 x 2pins pin-header for 12V external power 1 x 12pins pin-header for Front Audio(2x6) 2 x 8pins pin-header for USB (2X4) 1 x 10pins Digital I/O(2x5) 1 x 20pins pin-header for COM 3.4(RS232) (2X10) 1 x 10pins pin-header for COM2 (2X5) 1 x 2-pin Power-input connector 1 x 20pins Connector for LVDS 1 x 20pins Connector for DVI 1 x 3pins digital panel backlight brightness controller 1 x 7pins digital panel inverter 2 x MiniPCle connector (one for SSD, one for Wifi/3G)
Power Connector	Input: 2-pin Power-input connector
Expansion Slots	1 x Mini PCIe slot for wireless, 1 x Mini PCIe slot for SATA SSD
Form Factor	3.5 inch
Dimensions	146mm x 102mm
Mechanical & environmental	Operating temperature: 0 deg. C to 60 deg. C Operating Humidity: 10 ~ 90% Relative humidity, non-condensing Shock: Operating 15G, 11ms duration Vibration: Operating 5 Hz~500Hz / 1Grms / 3 Axis Certification: CE, FCC, RoHS

1.4 Function Block

1.5 Board dimensions

Installations

This chapter provides information on how to use the jumps and connectors on the WPC15 Motherboard. The Sections include:

- Memory Module Installation
- I / O Equipment Installation
- Setting the Jumpers
- Connectors on WPC15 Motherboard

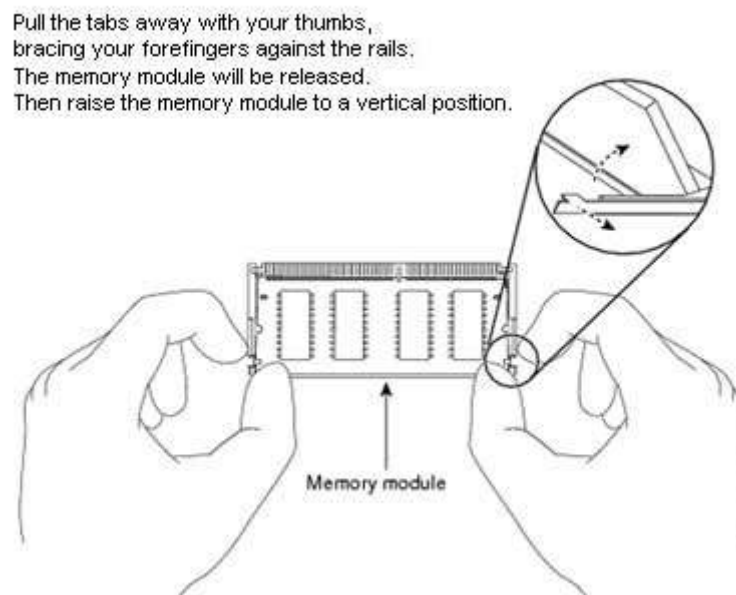

Chapter 2 Installations

2.1 Memory Module (SO-DIMM) Installation

The WPC15 Motherboard provides one 204-pin SODIMM slot. The socket supports up to 4GB DDR2 800/1066 SDRAM. When installing the Memory device, please follow the steps below :

Step.1. Firmly insert the SO-DIMM at an angle into its slot. Align the SO-DIMM on the slot such that the notch on the SO-DIMM matches the break on the slot.

Step.2. Press downwards on SO-DIMM until the retaining clips at both ends fully snap back in place and the SO-DIMM is properly seated.

➤ **Caution!**

The SO-DIMM only fits in one correct orientation. It will cause permanent damage to the development board and the SO-DIMM if the SO-DIMM is forced into the slot at the incorrect orientation.

2.2 I/O Equipment Installation

2.2.1 12V DC-IN

The Motherboard allows plugging 12V DC-IN jack on the board without another power module converter under power consumption by Intel Atom D2550 1.86GHz Processor in NM10 chipset.

2.2.2 Serial COM ports

Two RS-232 connectors build in the rear I/O. One optional COM ports support RS-422/485. When an optional touch-screen is ordered with PPC, serial com port can connect to a serial or an optional touch-screen.

2.2.3 External VGA

The Motherboard has one VGA port that can be connected to an external CRT/ LCD monitor. Use VGA cable to connect to an external CRT / LCD monitor, and connect the power cable to the outlet. The VGA connector is a standard 15-pin D-SUB connector.

2.2.4 Ethernet interface

The Motherboard is equipped with Broadcom BCM57780 chipset which is fully compliant with the PCI 10/100/1000 Mbps Ethernet protocol compatible. It is supported by major network operating systems. The Ethernet ports provide two standard RJ-45 jacks.

2.2.5 USB ports

Four USB devices (Two with pin headers) may be connected to the system though an adapter cable. Various adapters may come with USB ports. USB usually connect the external system to the system. The USB ports support hot plug-in connection. Whatever, you should install the device driver before you use the device.

2.2.6 Audio function

The Audio 7.1 channel capabilities are provided by a Realtek ALC886 chipset supporting digital audio outputs. The audio interface includes two jacks: line-in and line-out.

2.3 Jumpers and Connectors

TOP

BOTTOM

MiniPCIe for SSD

SO-DIMM

2.4 Jumper Setting

A pair of needle-nose pliers may be helpful when working with jumpers. If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any changes. Generally, you simply need a standard cable to make most connections.

The jumper setting diagram is as below. If a jumper shorts pin 1 and pin 2, the setting diagram is shown as the right one.

The following tables list the function of each of the board's jumpers.

Label	Function	Note
JP4	Clear CMOS	3x1 header , pitch 2.0mm
JP2	RS232 / RS422 / RS485 Selector	2x3 header , pitch 2.0mm
JP3	RS232 / RS422 / RS485 Selector	3x4 header , pitch 2.0mm
CON2	LVDS VOLTAGE	2x3 header , pitch 2.0mm
JP5	Backlight Power Voltage Selector	3x1 header , pitch 2.0mm
JP9	Backlight Power ON/OFF Selector	3x1 header , pitch 2.0mm
JP7	Backlight Brightness Voltage Selector	3x1 header , pitch 2.0mm
JP6 、 8	Backlight Adjust Mode Selector	3x1 header , pitch 2.0mm

2.4.1 JP4 : Clear CMOS

Pin No.	Functions
1 Short 2	Clear CMOS
2 Short 3	Normal

2.4.2 JP2 : RS232 / RS422 / RS485 Selector for CON port

Pin No.	Functions
1 Short 2	RS232
3 Short 4	RS422
5 Short 6	RS485

2.4.3 JP3: RS232 / RS422 / RS485 Selector for CON port

RS232	RS422/485
1-2	2-3
4-5	5-6
7-8	8-9
10-11	11-12

2.4.4 CON2 : LCD Panel Voltage Select

Pin No.	Functions
1 Short 2	3.3Volts Selected
2 Short 3	5Volts Selected
5 Short 6	12Volts Selected

2.4.5 JP5 : Backlight Power Input Voltage Level Select

Function
1-2 : 5.0V
2-3 : 12V

※ Default : 2-3

2.4.6 JP9 : Select Backlight Power ON/OFF

Function
1-2 : Control
2-3 : Non-Control

※ Default : 2-3

2.4.7 JP7 : Select Backlight Brightness input voltage level

Function
1-2 : 3.3V
2-3 : 5.0V

※ Default : 2-3

2.4.8 JP6 、 8 : Select Backlight Adjust Mode

Location	DC mode (For HW)	PWM mode (For BIOS)	DC mode (For BIOS)
JP6	1-2	2-3	2-3
JP8	1-2	2-3	1-2

※ Default : 1-2 (JP6,JP8)

2.5 Connectors and Pin Assignment

The table below lists the function of each of the board's connectors.

Label	Function	Note
LVDS1	LVDS LCD Output Connector	20DP-1.25V
JP1	Digital Panel Backlight Brightness Control	3x1 header, pitch 2.54mm
CON3	Digital Panel Backlight Inverter Power	7x1 header, pitch 2.54mm
VGA	VGA Output	15pin VGA
COM Port	COM1 for RS232/422/485	DB9
COM2	COM2 for RS232	2x5 header
COM3(Left)	COM3 for RS232	2x5 header
COM3(Right)	COM4 for RS232	2x5 header
AUDIO1	Audio connector	2x6 header
USB1	USB PIN HEADER	4x2 Pin Header
USB3	USB PIN HEADER	4x2 Pin Header
CPU_FAN	FAN CONNECTOR	3x1 Pin Header
PANEL1	System Function Connector	5x2 header ,pitch 2.0mm
12V1	12V External Power	2x1 header, pitch 2.0mm
5V1	5V External Power	2x1 header, pitch 2.0mm
CN10	12V/5V External Power	4x2 header ,pitch 2.54mm
DC JACK2	12V DC Jack	2 Pin Jack
DIDO1	Digital I/O	2x5 Pin header
J2/J3	Amplifier	2 Pin header
DVI1	DVI LCD Output Connector	20DP-1.25V

* Not Default Connector

2.5.1 LVDS1: LVDS Connector

Pin No.	SYMBOL	Pin No.	SYMBOL

CHAPTER 3

Graphic Driver Installation

This chapter offers information on the chipset software Installation utility

- Installation of Graphic Driver
- Panel Resolution Setting

Chapter 3 Graphic Driver Installation

3.1 Standard CMOS Feature

WPC15 Motherboard is equipped with Intel NM10 Companion Device. The Intel Graphic Drivers should be installed first, and it will enable “Video Controller (VGA compatible). Follow the instructions below to complete the installation. You will quickly complete the installation.

Step.1. Insert the CD that comes with the Motherboard. Open the file document “Graphic Driver “.

Step.2. Click on “setup” to execute the setup.

Name	Date modified	Type	Size
Graphics	12/27/2011 5:26 PM	File folder	
HDMI	12/27/2011 5:26 PM	File folder	
ICC	12/27/2011 5:26 PM	File folder

Setup2.if2	9 2:15 PM	IF2 File	3 KB

Type: Application
Size: 929 KB
Date modified: 12/13/2011 3:20 PM

Step.3. Click on “Next “ to install Driver.

Step.4. Click on “Yes “ to agree License.

Step.5. Click on “Next “ to install Driver.

Step.6. Click on “Next “ to install Driver.

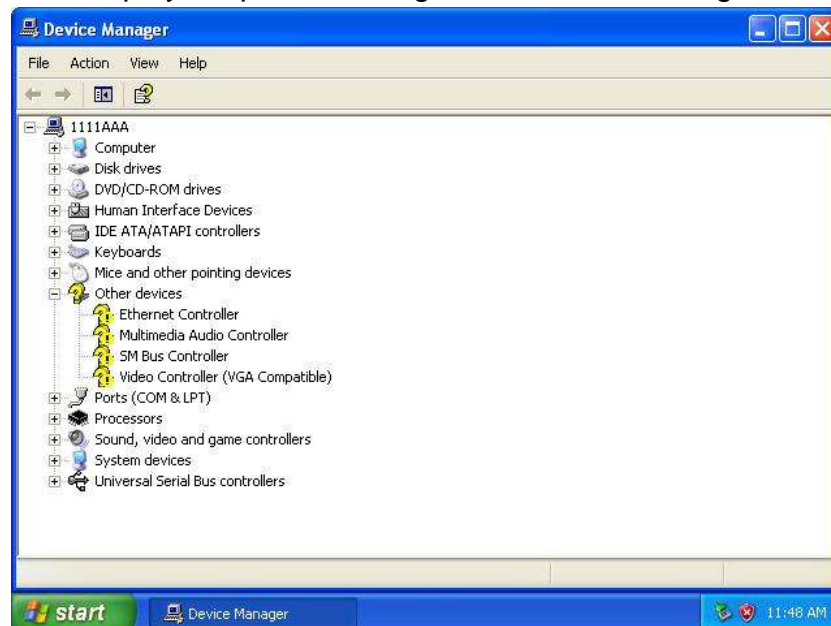

Step.7. Click on “Yes, I want to restart this computer now” to go on.

3.2 Panel Resolution Setting

Step.1. Right-click the desktop, and then click Properties.

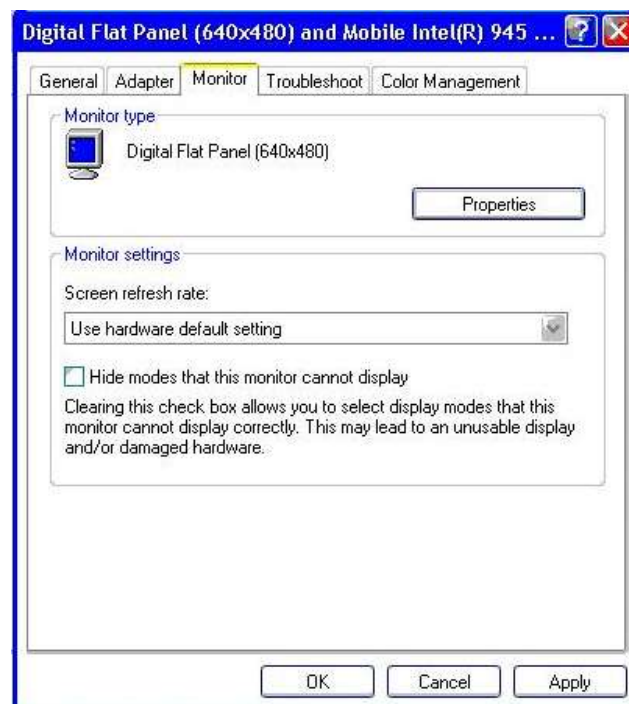

Step.2. In the Display Properties dialog box, click the Settings tab.

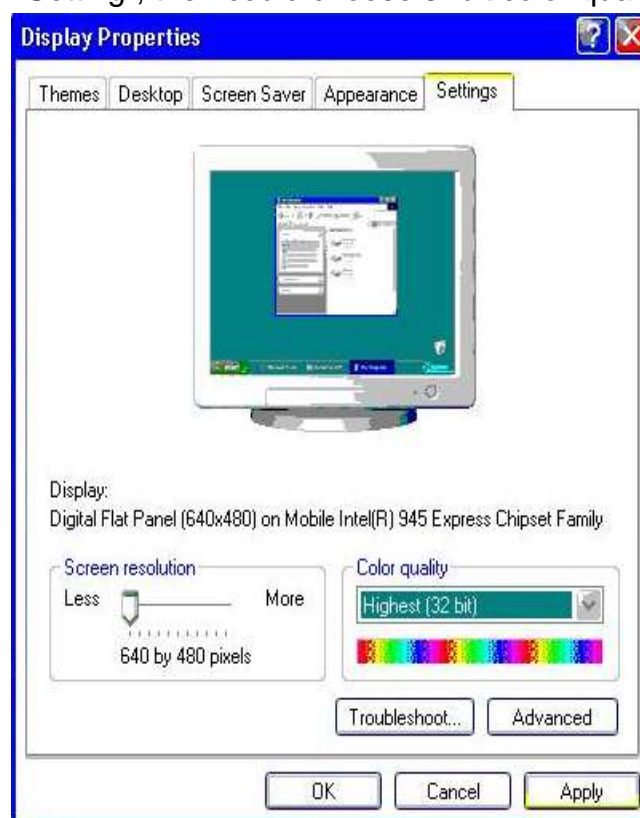

Step.3. Click on "Monitor".

Step.4. Click on “Hide modes that this monitor cannot display” to remove this option.

Step.5. Click on “Setting”, then could choose 32bit color qualify.

CHAPTER 4

Chipset Driver Installation

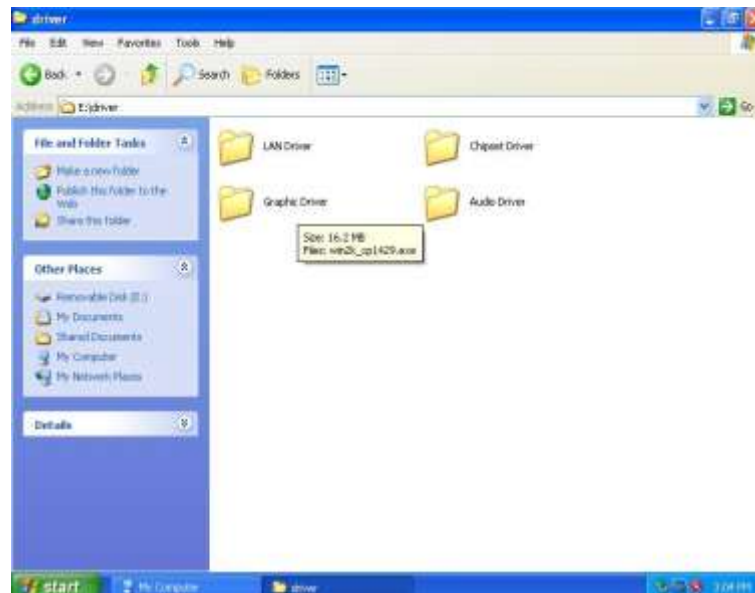

This chapter offers information on the chipset software Installation utility

- Installation of Chipset Driver
- Further information

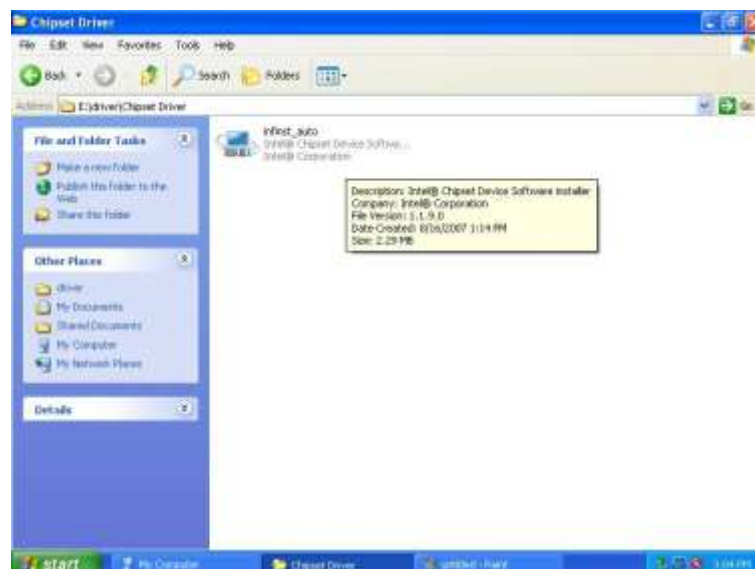

Chapter 4 Chipset Driver Installation

4.1 Standard CMOS Features

Setp.1. Insert the CD that comes with the motherboard. Open the file document “Chipset Driver”.

Setp.2. Click on “infinst_auto.exe” to install driver.

Setp.3. Click on “Yes “ to agree License

Setp.4. Click on “Next“ to install driver.

Setp.5. Click on “Next” to install driver.

Step.7. Click on “Yes, I want to restart this computer now” to go on.

CHAPTER 5

Ethernet Driver Installation

This chapter offers information on the Ethernet software installation utility.

Sections include:

- Introduction
- Installation of Ethernet Driver

Chapter 5 Ethernet Driver Installation

Installation of Ethernet Driver

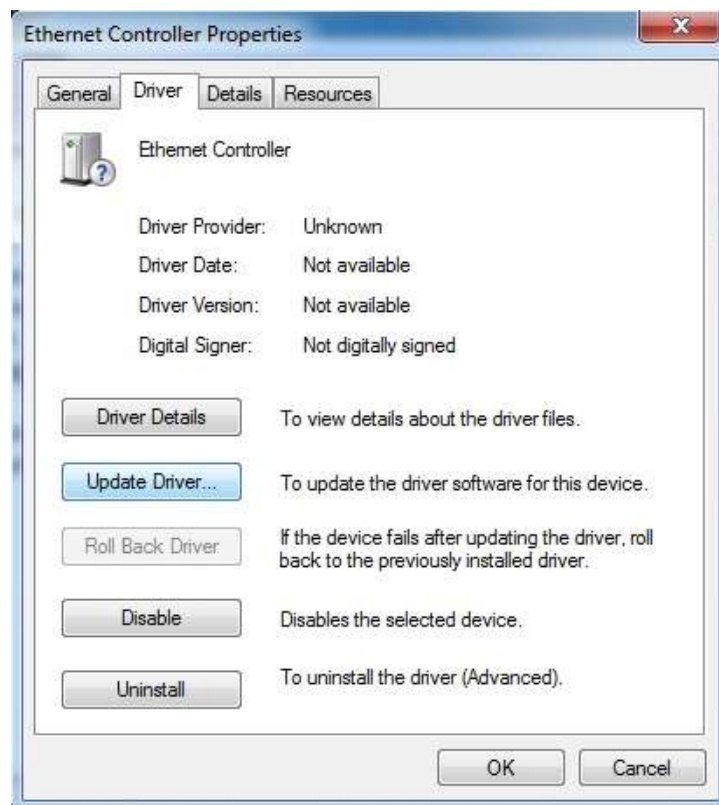

The Users must make sure which operating system you are using in the WPC15 Motherboard before installing the Ethernet drivers. Follow the steps below to complete the installation of the Broadcom BCM57780 Gigabit Ethernet controller LAN drivers. You will quickly complete the installation.

Step.1. Right-click the desktop, and then click Properties.

Step.2. In the Other device dialog box, click the Settings tab.

Step.2 Click on “Update Driver” to execute the setup.

Step.4. Click on “Browse my computer for driver software” to install driver.

Step.5. Choose the path to install driver.

Setp.6. Click on “Close” and go on.

Audio Driver Installation

This chapter offers information on the Audio software installation utility.

Sections include:

- Introduction
- Installation of Audio Driver

Chapter 6 Audio Driver Installation

6.1 Introduction

The ALC888 series are high-performance 7.1+2 Channel High Definition Audio Codecs providing ten DAC channels that simultaneously support 7.1 sound playback, plus 2 channels of independent stereo sound output (multiple streaming) through the front panel stereo outputs. The series integrates two stereo ADCs that can support a stereo microphone, and feature Acoustic Echo Cancellation (AEC), Beam Forming (BF), and Noise Suppression (NS) technology.

6.2 Installation of Audio Driver

The users must make sure which operating system you are using in the IA30 Motherboard before installing the Audio drivers. Follow the steps below to complete the installation of the Realtek ALC655 Audio drivers. You will quickly complete the installation.

Step.1. Insert the CD that comes with the motherboard. Open the file document “alc655_driver” and click on “Vista_Win7_R260.exe” to execute the setup.

Name	Date modified	Type	Size
 Vista_Win7_R260	5/10/2011 3:21 PM	Application	86,021 KB

Step.2. Click on “Yes” to install driver.

Step.3. Click on “Yes, I want to restart my computer now” to finish installation.

CHAPTER 7

Fintek COM Port Driver Installation

This chapter describes the step by step method to install the Fintek COM port driver.

STEP 1.If the system is WIN7 please first do close UAC.(Refer following “Disabling User Account

Control (UAC) in Windows 7”)

STEP 2.Extract the Patch_0408.zip to a folder.

STEP 3.Double-click batch file(patch.bat) will install driver.

STEP 4.Check driver install success.

Before the update or update fail.

After the update and update success.

STEP 5.You will need to restart your computer for driver install success.

Type in this command from the Run menu:

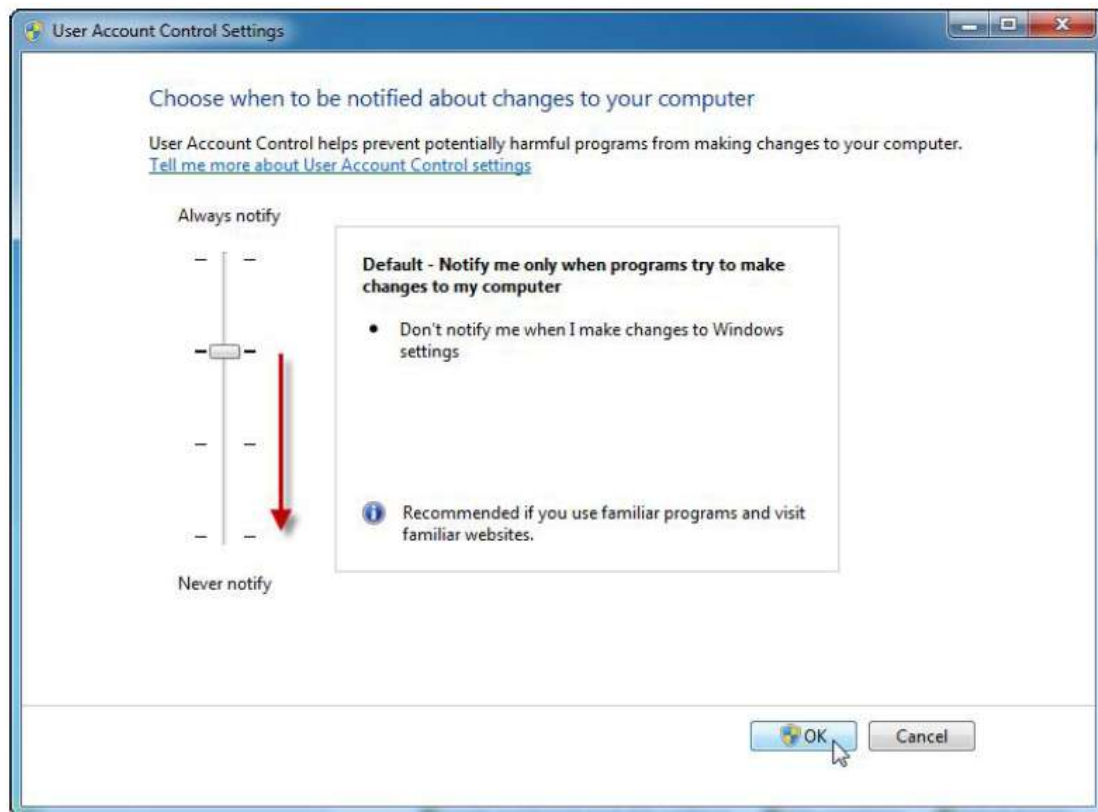

C:\Windows\System32\UserAccountControlSettings.exe

or

uac

To turn off UAC, move the slider to the Never notify position, and then click OK. If you're prompted for an administrator password or confirmation, type the password or provide confirmation.

To turn UAC back on, move the slider to choose when you want to be notified, and then click OK. If you're prompted for an administrator password or confirmation, type the password or provide confirmation.

You will need to restart your computer for UAC to be turned off.

AMI BIOS Setup

This chapter describes how to set up the BIOS configuration

Chapter 7 AMI BIOS SETUP

Your computer comes with a hardware configuration program which called BIOS Setup that allows you to view and set up the system parameters.

The BIOS (Basic Input / Output System) is a layer of the software called ‘firmware’ which translates instructions from software (such as the operating system) into instructions that allow the computer hardware to understand the software programs. The BIOS settings also identify installed devices and establish many special features.

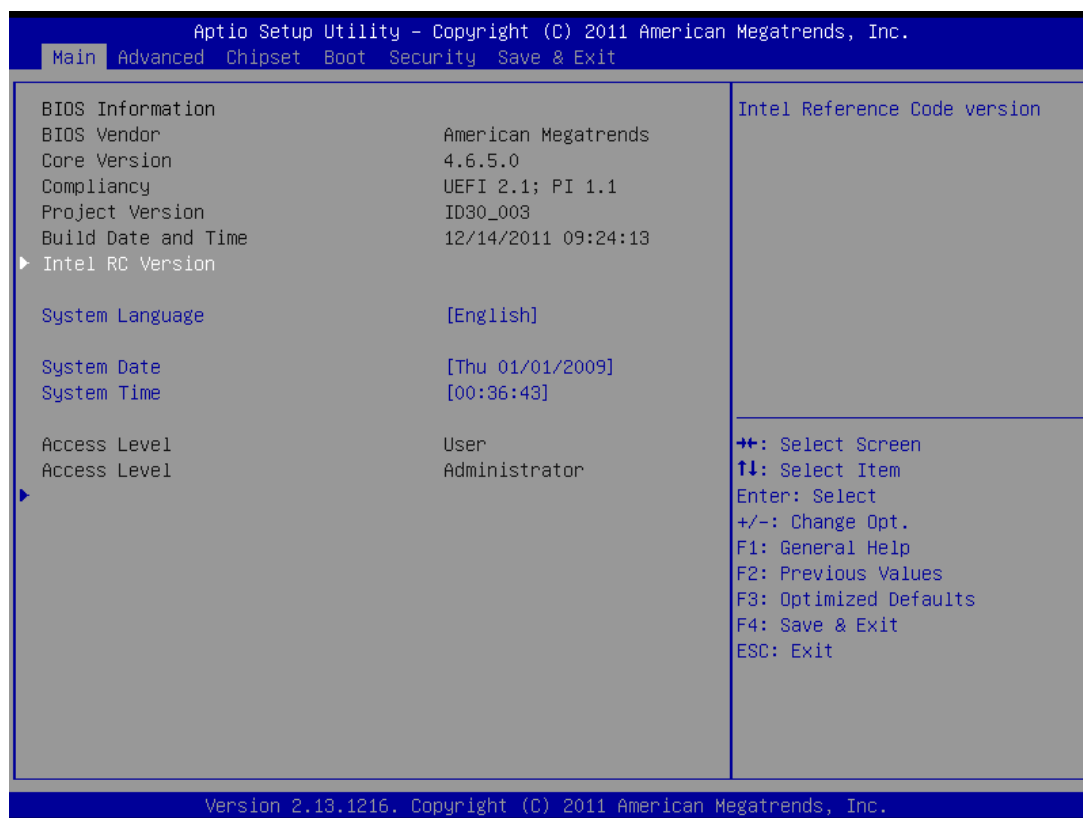

ENTERING BIOS SETUP

You can access the BIOS program just after you turn on your computer. Just press the “DEL” key when the following prompt appears:

Press to enter Setup.

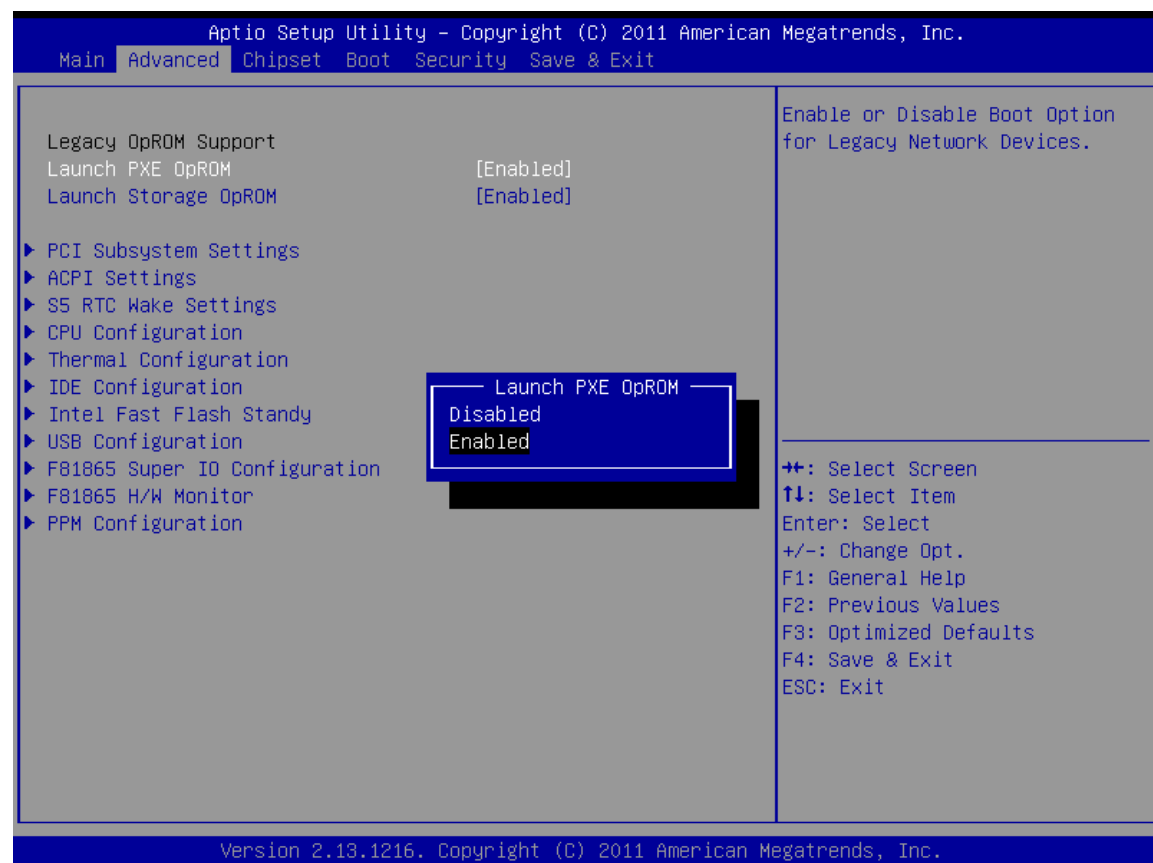

When you press to enter the BIOS Setup image, the system interrupts the Power-On Self-Test (POST).

When you first enter the BIOS Setup Utility, you will enter the Main setup image. You can always return to the Main setup image by selecting the Main tab. There are two Main Setup options. They are described in this section. The Main BIOS Setup image is shown as below.

The Main BIOS setup image has two main frames. The left frame displays all the options that can be configured. Grayed-out options cannot be configured. On the contrary, options in blue can be configured. The right frame displays the key legend. Above the key legend is an area reserved for a text message. When an option is selected in the left frame, it is highlighted in white. Often a text message will accompany it.

7.1 Advanced Setting

➤ Launch PXE OpROM

SETTING	DESCRIPTION
Disabled	Use this setting to ignore all PXE Option ROMs.
Enabled	Use this setting to load PXE Option ROMs. To limit the PXE support to particular devices, use the function Use device for PXE.

Default: Disabled

➤ Launch Storage OpROM

SETTING	DESCRIPTION
Disabled	Use this setting to ignore all Storage Option ROMs.
Enabled	Use this setting to load Storage Option ROMs. To limit the Storage support to particular devices, use the function Use device for Storage.

Default: Disabled

➤ PCI ROM Priority

Selects the PCI Option ROM to launch in case Multiple Option ROMs (**Legacy ROM** and **EFI Compatible ROM**) are present.

➤ PCI Latency Timer

Use this function to select the number of PCI bus clocks to be used for the PCI latency timer.

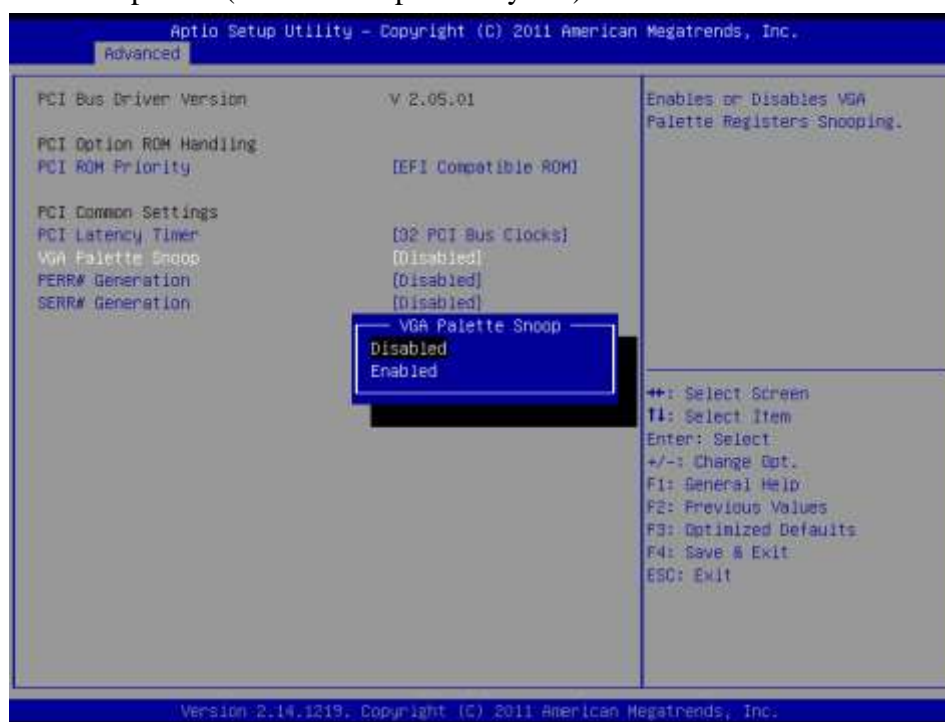

SETTING	DESCRIPTION
32 PCI Bus Clocks	Use this setting to program the PCI latency timer to 32 PCI bus clocks.
64 PCI Bus Clocks	Use this setting to program the PCI latency timer to 64 PCI bus clocks.
96 PCI Bus Clocks	Use this setting to program the PCI latency timer to 96 PCI bus clocks.
128 PCI Bus Clocks	Use this setting to program the PCI latency timer to 128 PCI bus clocks.
160 PCI Bus Clocks	Use this setting to program the PCI latency timer to 160 PCI bus clocks.
192 PCI Bus Clocks	Use this setting to program the PCI latency timer to 192 PCI bus clocks.
224 PCI Bus Clocks	Use this setting to program the PCI latency timer to 224 PCI bus clocks.
248 PCI Bus Clocks	Use this setting to program the PCI latency timer to 248 PCI bus clocks.

Default: 32 PCI Bus Clocks

➤ **VGA Palette Snoop**

This field controls the ability of a primary PCI VGA controller to share a common palette (when a snoop write cycles) with an ISA video card.

Enables or Disables VGA Palette Registers Snooping.

Default: Disabled

➤ **PERR# Generation**

Enables or Disables PCI Device to Generate PERR#.

Default: Disabled

➤ **SERR# Generation**

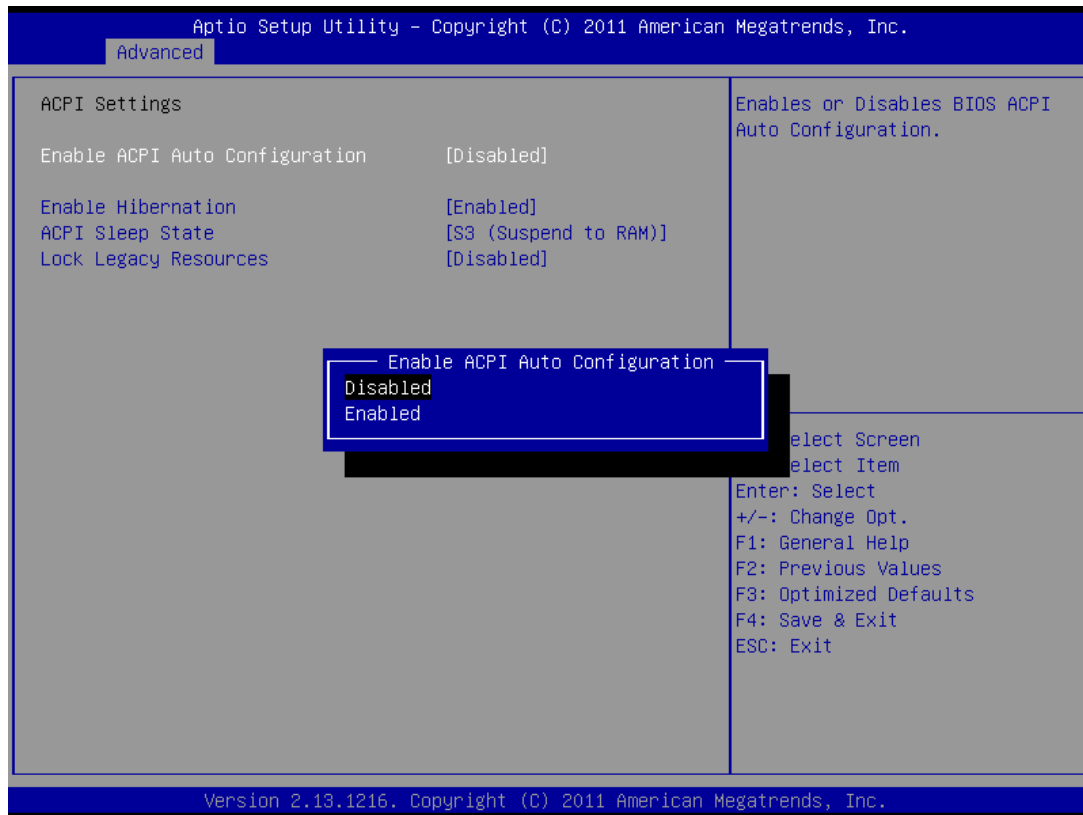

Enables or Disables PCI Device to Generate SERR#.

Default: Disabled

ACPI Settings

➤ Enable ACPI Auto Configuration

Enables or Disables BIOS ACPI Auto Configuration

Default: Disabled

➤ Enable Hibernation

Enables or Disables System ability to Hibernate. This option may be not effective with some OS.

➤ ACPI Sleep State

SETTING	DESCRIPTION
Suspend Disable	System ability to Hibernate (OS/S3 Sleep State)
S1	CPU Stop Clock
S3	Suspend to RAM

Default: S3 (Suspend to RAM)

➤ Lock Legacy Resources

Enables or Disable Lock of Legacy Resource.

Default: Disable

S5 RTC Wake Settings

SETTING	DESCRIPTION
Wake system with Fixed Time	System wake on alarm event. When enabled, System will wake on the hr: min:: sec specified.
Wake system with Dynamic Time	Options: Enabled, Disabled

CPU Configuration

➤ Hyper-threading

Enabled for Windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized for Hyper-Threading Technology).

When Disabled, only one thread per enabled core is enabled.

➤ Execute Disable Bit

XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS (Windows Server 2003 SP1, Windows XP SP2, SuSE Linux 9.2, RedHat Enterprise 3 Update 3.)

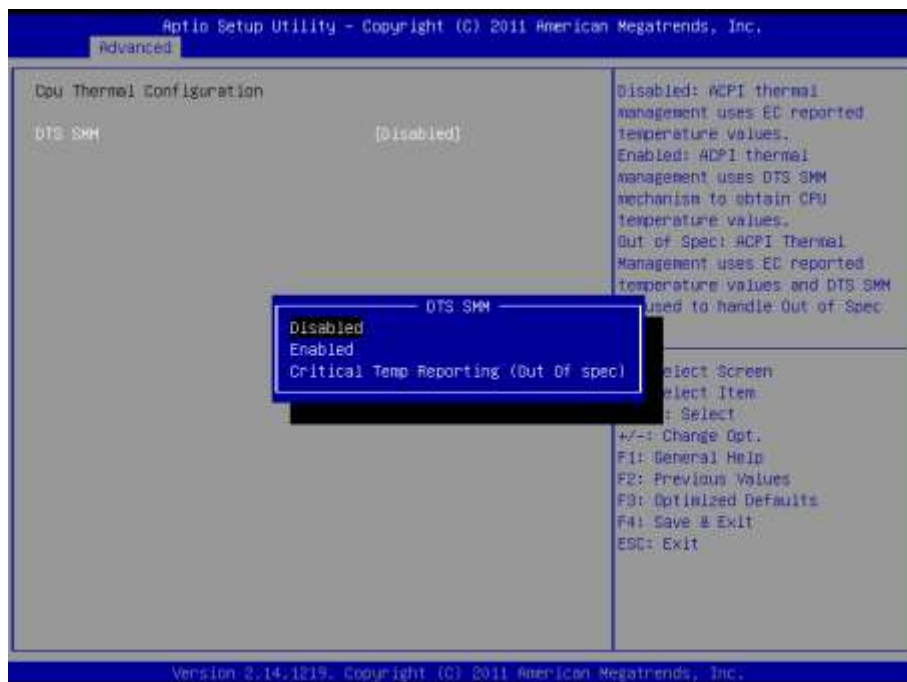

➤ Limit CPUID Maximum

Disabled for Windows XP

Thermal Configuration

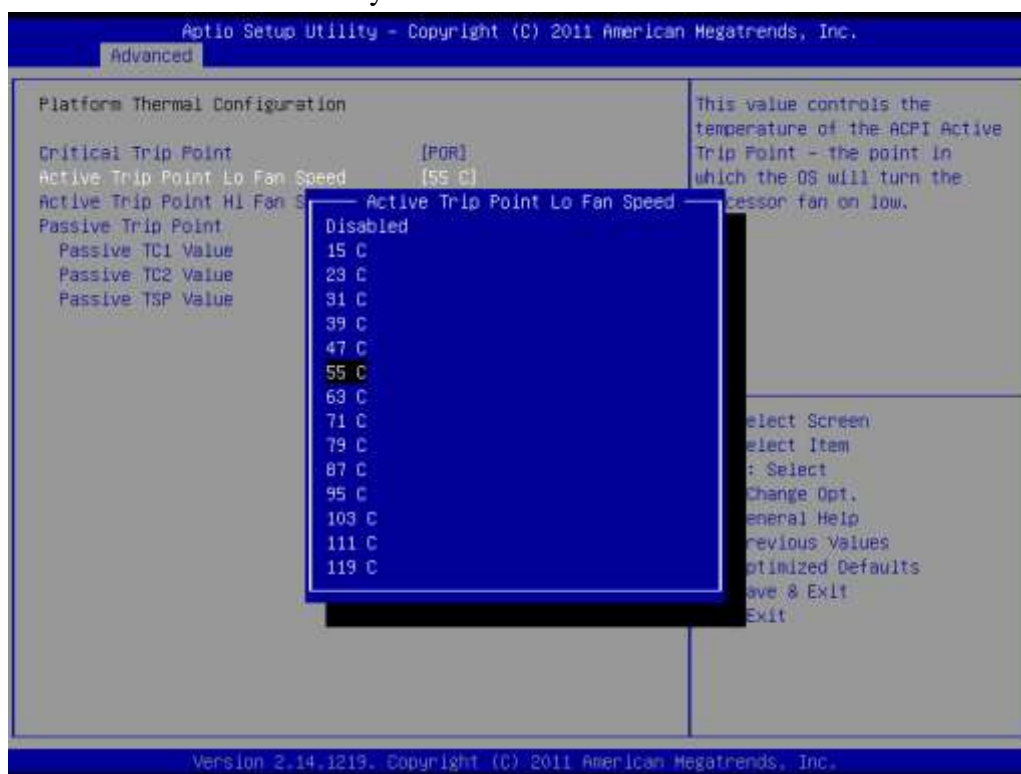

➤ CPU Thermal Configuration > DTS SMM

SETTING	DESCRIPTION
Disabled	Uses EC reported temperature values
Enabled	Uses DTS SMM mechanism to obtain CPU temperature value
Critical Temp Reporting(Out of spec)	Uses EC reported temperature values and DTS SMM to handle out of spec

➤ **Critical Trip Point**

This value controls the temperature of the ACPI critical Trip point—the point in which the OS will shut the system off.

➤ **Active Trip Point Lo Fan Speed**

➤ **Active Trip Point Hi Fan Speed**

This field enables or disables the smart fan feature. At a certain temperature, the fan starts turning. Once the temperature drops to a certain level, it stops turning again.

➤ **Passive TC1 Value**

➤ **Passive TC2 Value**

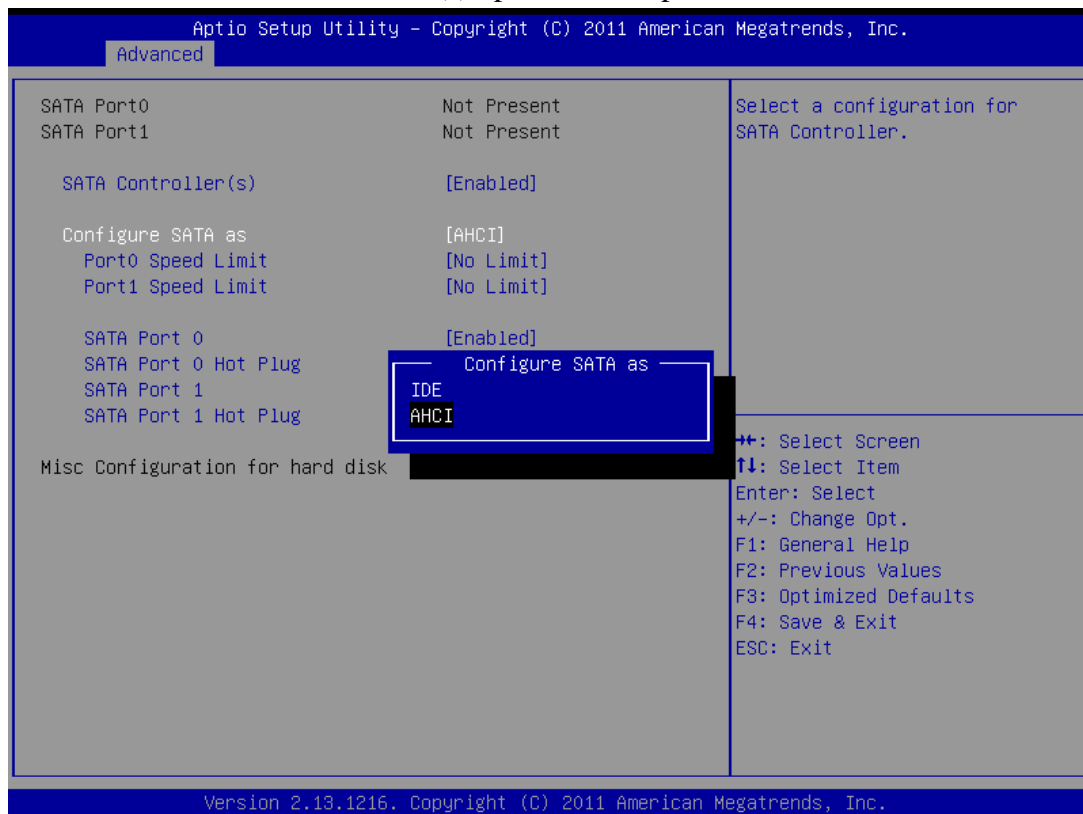

➤ **Passive TSP Value**

IDE Configuration

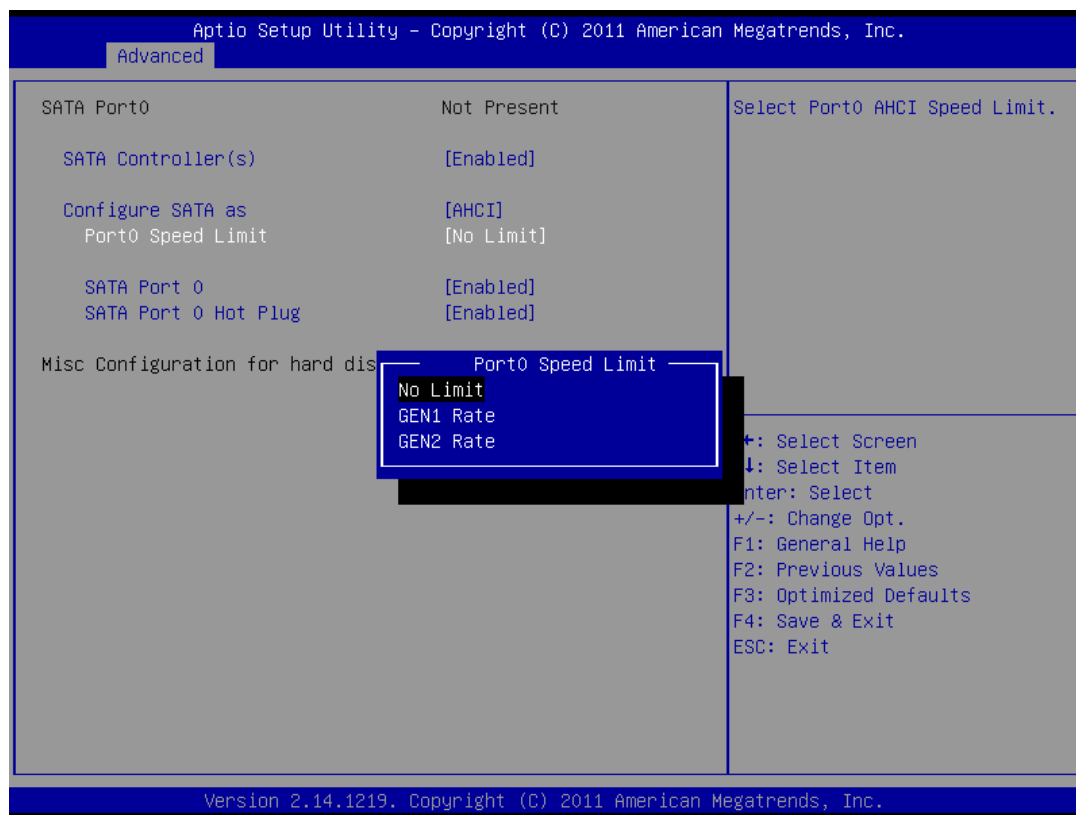

➤ Configure SATA as

Determines how SATA controllers(s) operate. The options are IDE and AHCI.

➤ Port0 Speed Limit

Select Port0 AHCI Speed Limit. The options are No Limit, GEN1 Rate and GEN2 Rate.

➤ SATA Port 0/1

Enable or disable SATA Port.

➤ SATA Port 0/1 Hot Plug

Designates this port as Hot Pluggable

Intel Fast Flash Standby

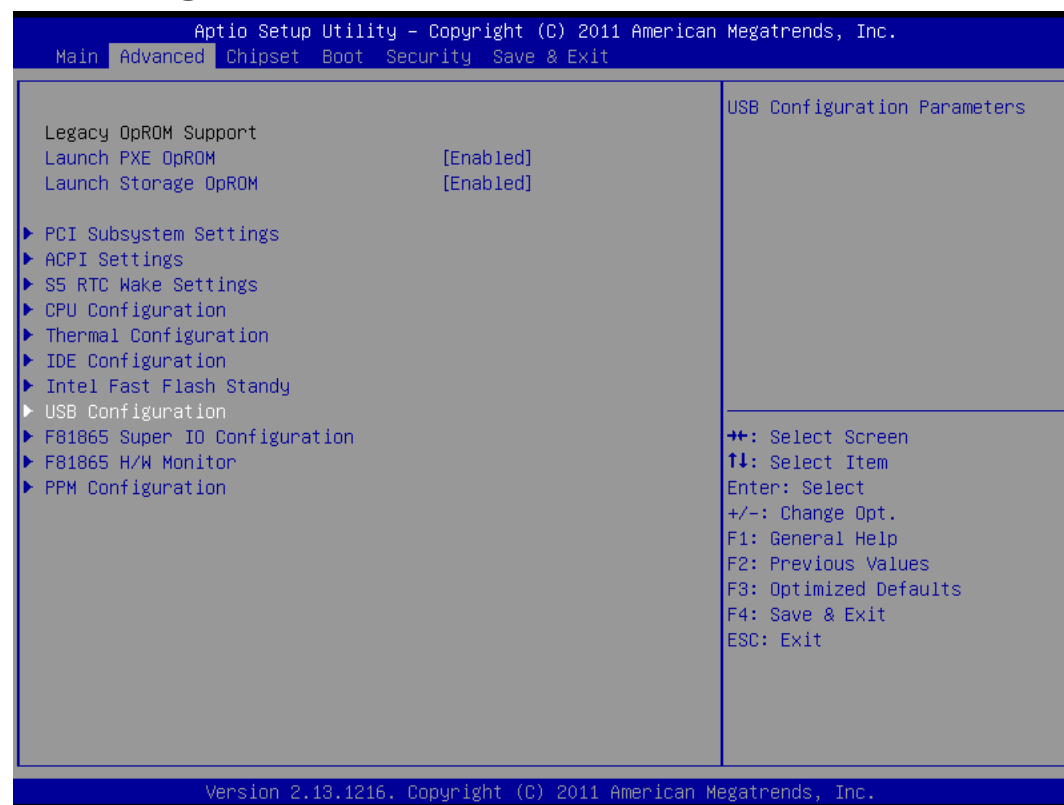

➤ iFFS Support

Enable or disable

USB Configuration

➤ Legacy USB support

Enables Legacy USB support. AUTO option disable legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI applications.

➤ ECHI Hand-off

This is a workaround for OSes without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

Default: Disabled

➤ USB transfer time-out

The time-out value for control, bulk, and Interrupt transfers.

Default: 20 sec

➤ Device reset time-out

The USB mass storage device Start Unit command time-out.

Default: 20 sec

➤ Device power-up delay

Maximun time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100 ms, for a Hub port the delay is taken from Hub descriptor.

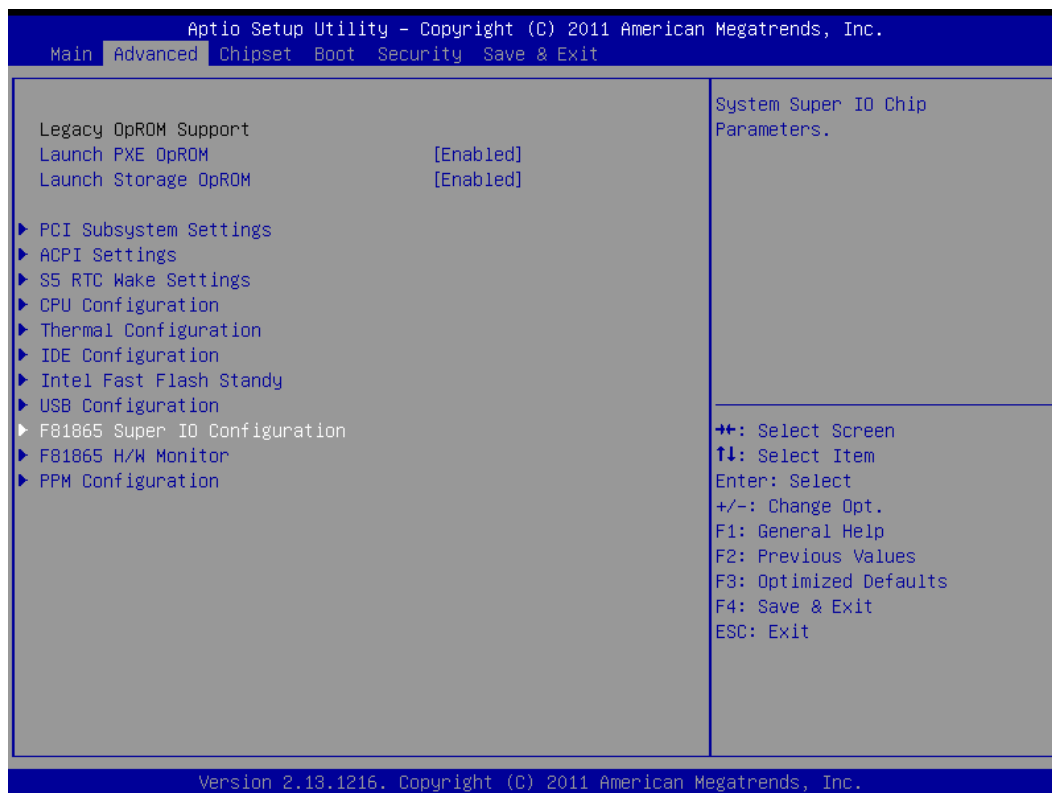

➤ **Mass Storage Device:**

Mass storage device emulation type. 'AUTO' enumerates devices less than 530MB as floppies. Forced FDD option can be used to force HDD formatted drive to boot as FDD.

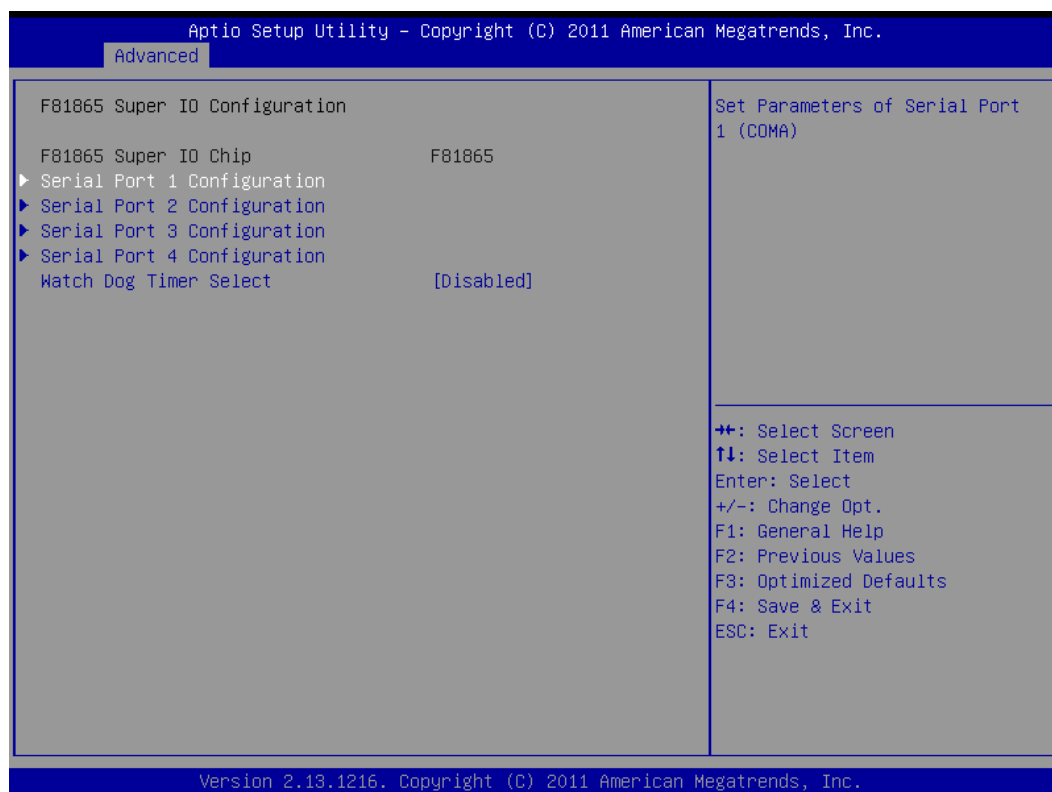

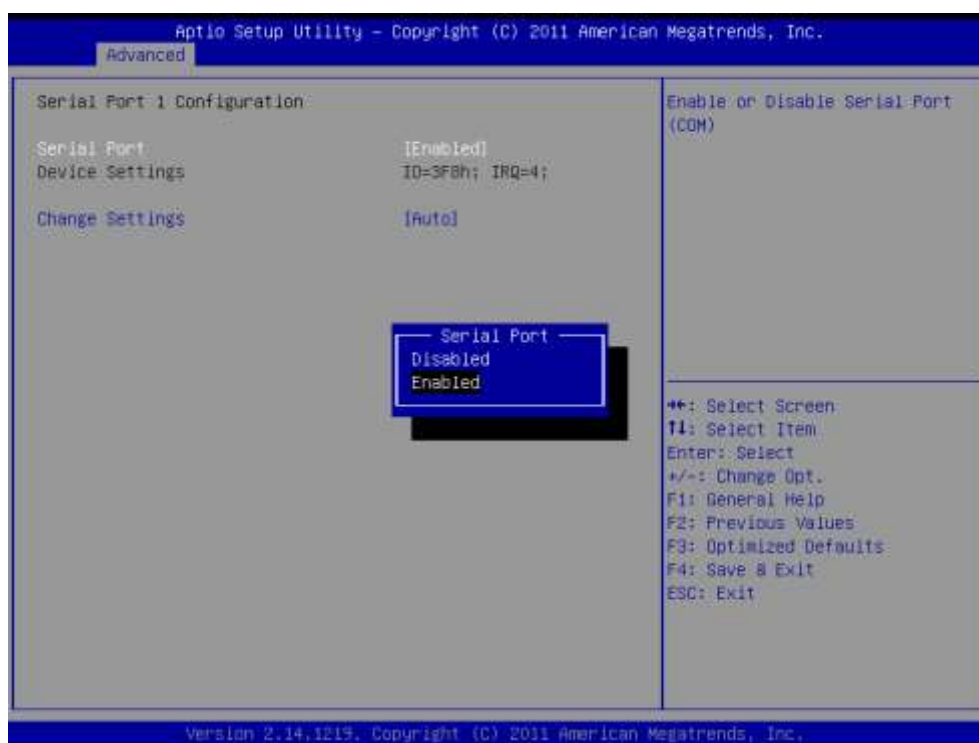

F81865 Super IO Configuration

System Super IO Chip Parameters.

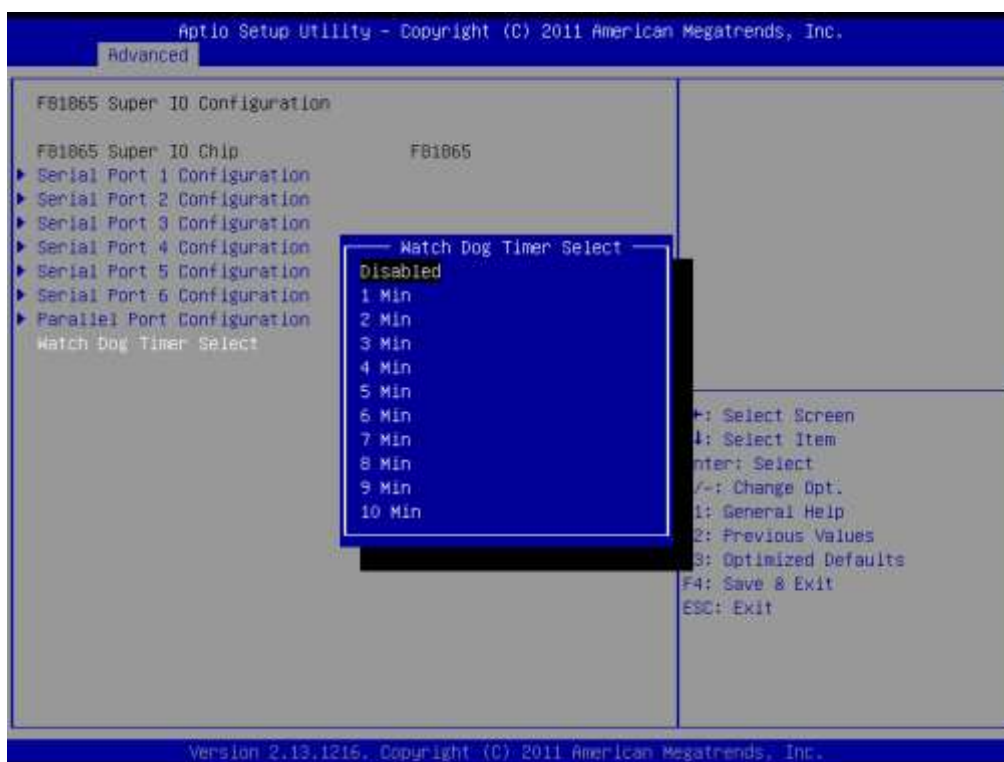

➤ Serial Port 1、2、3、4、5、6 Configuration

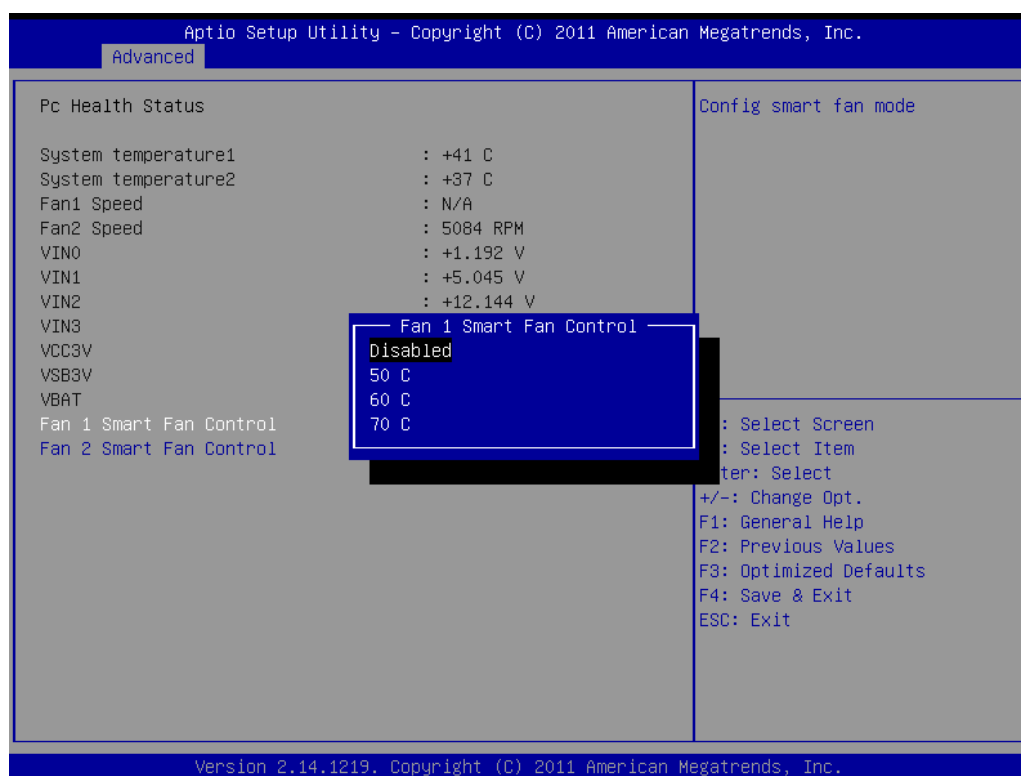

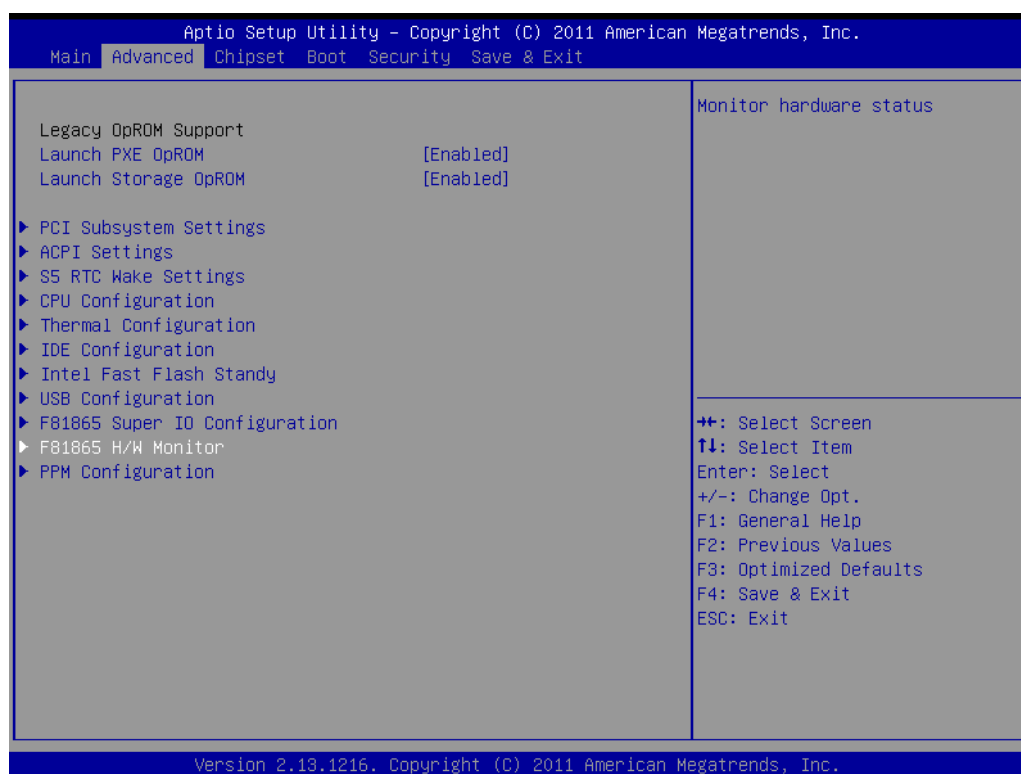

Set Parameters of Serial Ports. User can Enable/Disable the serial port and Select an optimal settings for the Super IO Device. Enable or Disable Serial Port (COM)

Default: Enable

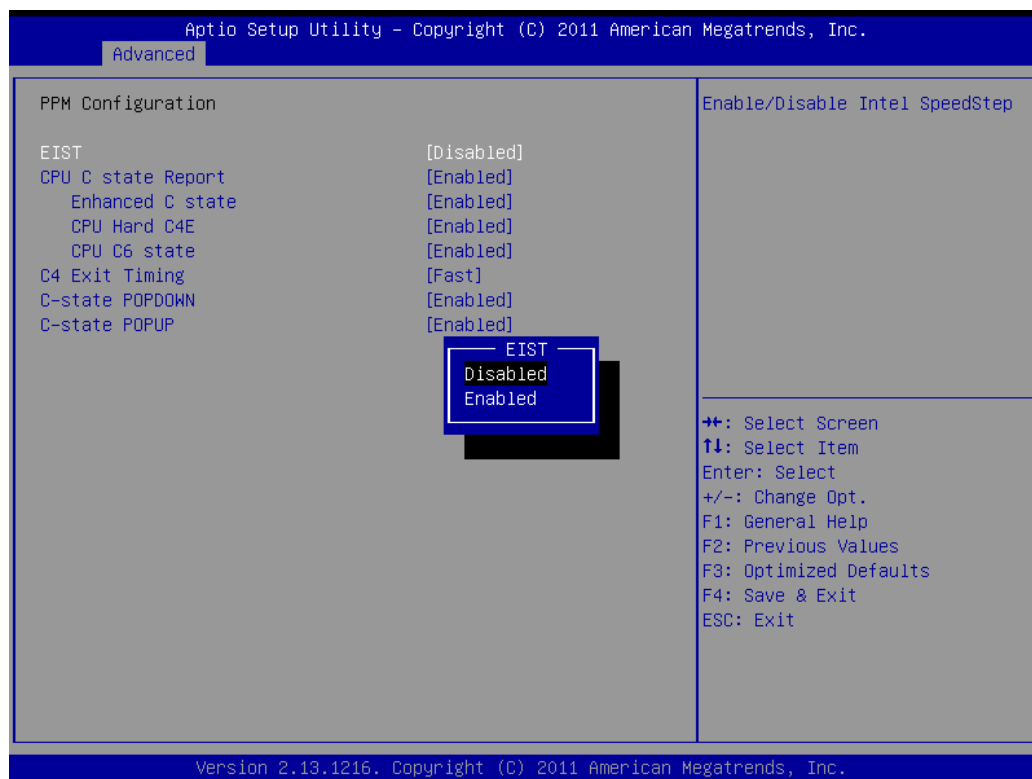

The watchdog timer circuit has to be triggered within a specified time by the application software. If the watchdog is not triggered because proper software execution fails or a hardware malfunction occurs, it will reset the system

➤ F81865 H/W Monitor

Fan 1 、 2 Config smart fan mode, can choose 50,60 and 70 three degree mode

PPM Configuration

➤ EIST

Enable/Disable Intel SpeedStep.

➤ CPU C state Report

Enable/Disable CPU C state report to OS.

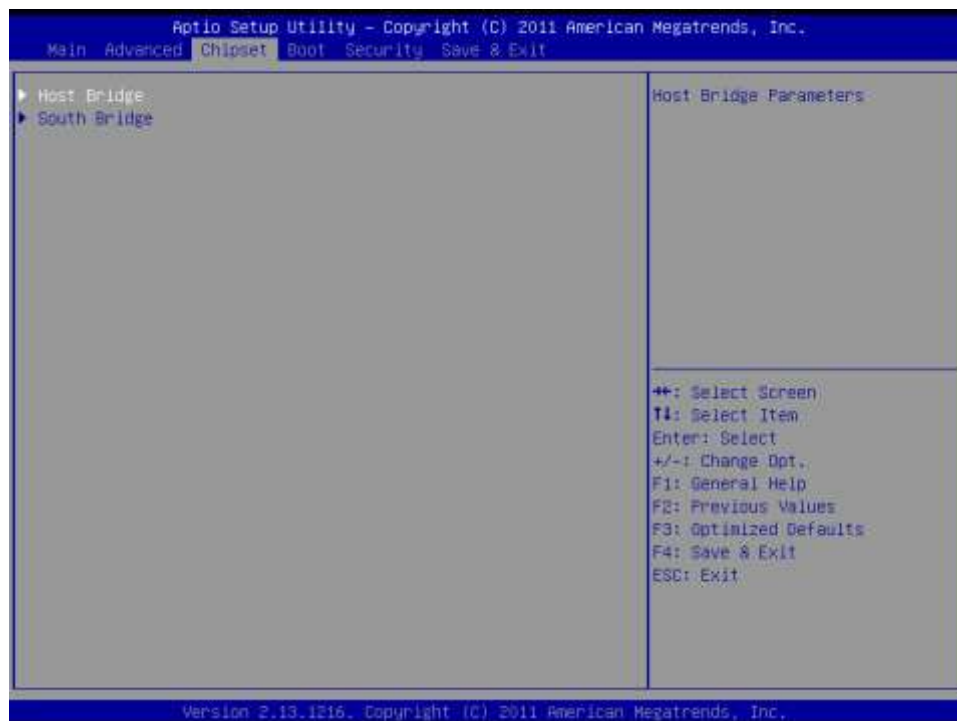

➤ C4 Exit Timing

This option controls a programmable time for the CPU voltage to stabilize when exiting from a C4 state.

Chipset

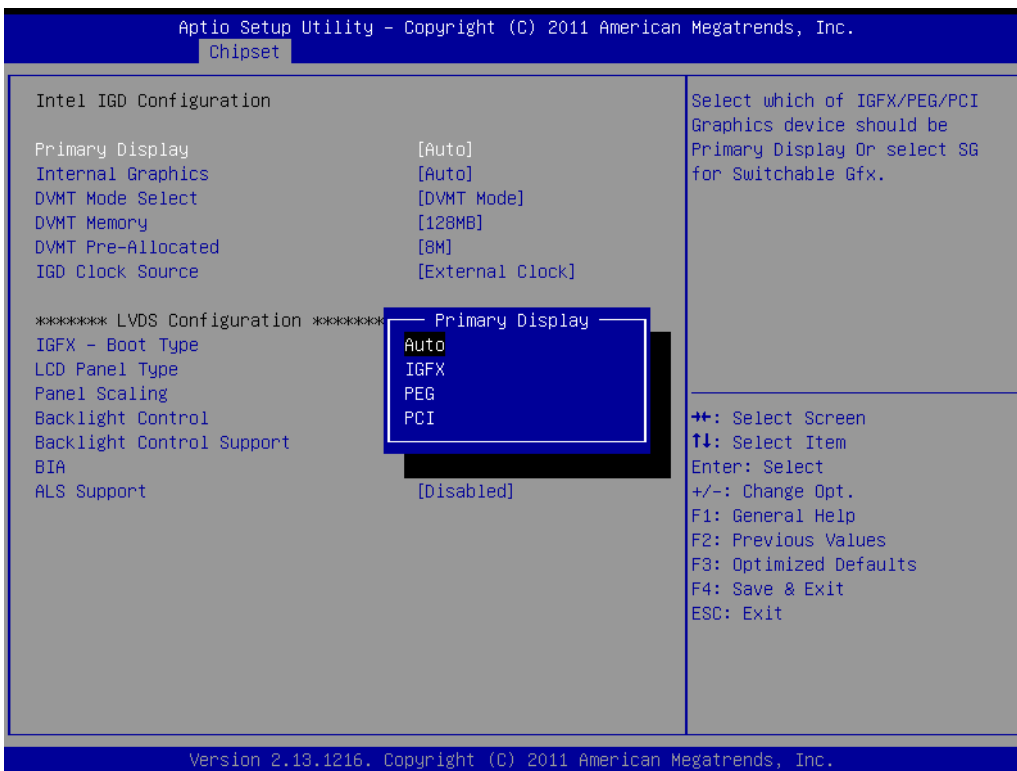

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

➤ Memory Frequency and Timing

➤ Intel IGD Configuration

➤ Primary Display

Select which of IGFX/PEG/PCI Graphics device should be Primary display.

➤ Internal Graphics

Keep IGD enabled based on the setup options.

➤ DVMT

Intel's Dynamic Video Memory Technology (DVMT) takes that concept further by allowing the system to dynamically allocate memory resources according to the demands of the system at any point in time. The key idea in DVMT is to improve the efficiency of the memory allocated to either system or graphics processor.

➤ IGD Clock Source

IGD clock selection.

➤ LCD Panel Type

Select LCD panel used by Internal Graphics Device by selecting the appropriate setup item.

➤ Panel Scaling

Select the LCD panel scaling option used by the Internal Graphics Device.

➤ Backlight Control

IGD clock selection.

➤ Backlight Control Support

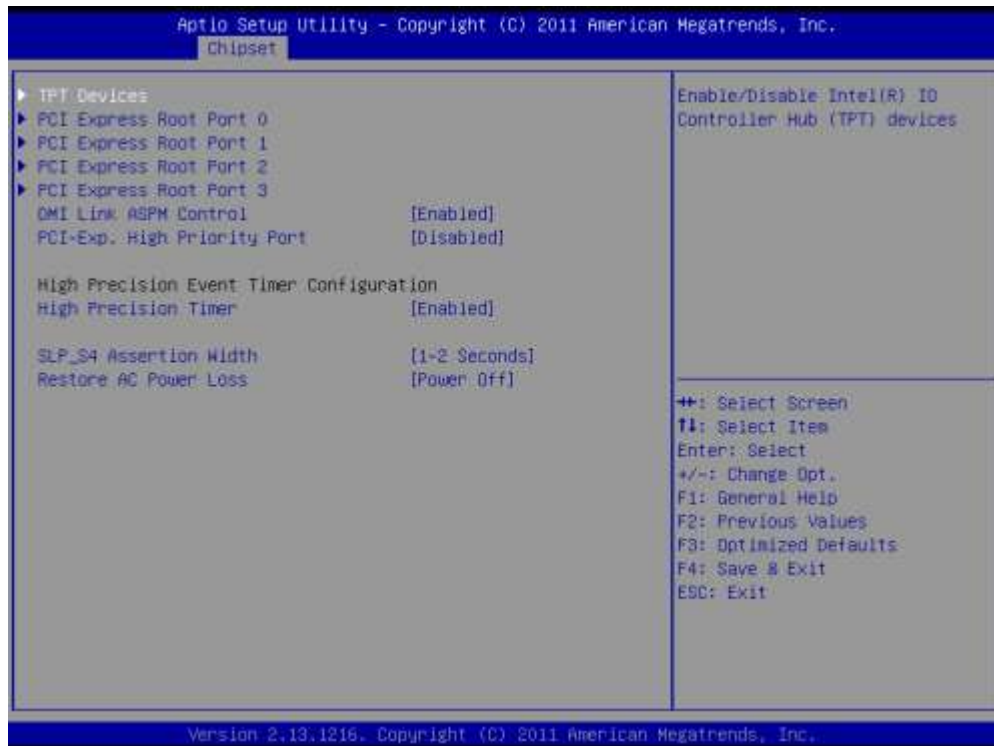

Back Light Control Setting.

➤ BIA

Auto:GMCH Use VBT Default; Level n: Enabled with Selected Aggressiveness Level, .

➤ ALS Support

Valid only for ACPI.

➤ **TPT Devices**

Enable/Disable Intel IO controller hub device

➤ **PCI Express Root Port 0/1/2/3**

PCI Express root port settings

➤ **DMI Link ASPM Control**

The Desktop Management Interface (DMI) generates a standard framework for managing and tracking components in a desktop, notebook or server computer, by abstracting these components from the software that manages them.

➤ **PCI-Exp. High Priority Port**

Select a PCI Express High Priority Port.

5.3 Boot

➤ Setup Prompt Timeout

Number of seconds to wait for setup activation key. 65535 (0xFFFF) means indefinite waiting.

Default: 1

➤ Bootup NumLock State

Select the keyboard NumLock State

Default: On

➤ Quiet Boot

Enable or Disable Quiet Boot Option.

Default: Disable

➤ GateA20 Active

UPON REQUEST – GA20 can be disabled using BIOS services. Always – do not allow disabling GA20; this option is useful when any RT code is executed above 1MB.

➤ Option ROM Messages

Set display mode for Option ROM. Options are Force BIOS and Keep Current.

➤ Interrupt 19 Canture

Enable: Allows Option ROMs to trap Int 19.

➤ Boot Option

This option shows the priorities of the boot options. User can change the priorities by selecting the particular boot option. The boot option selected in Boot option #1 will be the first priority, followed by second, third and so on.

➤ Network/Hard Device BBS Priorities

It will list all the Boot options that are configured as Network/Hard Drive. User can change the priority as similar to the main boot option priorities. The first boot option will be having top boot priority and will appear at the boot option priorities and boot order.

5.4 Security

➤ Administrator Password

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

➤ Administrator Password

Set Setup Administrator Password.

➤ User Password

Set User Password.

5.5 Save & Exit

➤ Save Changes and Exit

Exit system setup after saving the changes.

➤ Discard Changes and Exit

Exit system setup without saving any changes.

➤ Save Changes and Reset

Reset the system after saving the changes.

➤ Discard Changes and Reset

Reset system setup without saving any changes.

➤ Save Changes

Save Changes done so far to any of the setup options.

➤ Discard Changes

Discard Changes done so far to any of the setup options.

➤ Restore Defaults

Restore/Load Defaults values for all the setup options.

➤ Save as User Defaults

Save the changes done so far as User Defaults.

➤ Restore User Defaults

Restore the User Defaults to all the setup options.

➤ Launch EFI Shell from filesystem devices

Attempts to launch EFI shell application from one of the available filesystem devices.

Note1: Digital I/O Sample Code

```
//File of the Main.cpp
//=====
//This code is for test IA30 Super I/O.
//=====
#include <dos.h>
#include <conio.h>
#include <stdio.h>
#include <stdlib.h>
