

User Manual WAP10

Respect users,

Thank you for your purchase and use of our products. For your security and interests , read the product instructions and all the attached data before using it. If you do not operate the product in accordance with product instructions, resulting in any personal injury, property or other losses, the company will not be responsible for that.

About the product instructions (hereinafter referred "instructions")

- ◆ Copyright of instructions belongs to our company;
- ◆ Mentioned trademarks, type size in the instructions belongs to their respective owners;
- ◆ If the content of instructions is inconsistent with the actual products, whichever are actual products.

If you are unknown or objectionable to the clauses of the instructions, please propose a written objection to our company within 7 days after purchasing it. otherwise you have agreed ,understood and accepted all the content of the instructions.

1. Attention

1.1 Special tips

In order to make you pay reasonable attention on certain note, please see the following notice:

【DANGER】 -- Attention! High danger

【WARNING】 -- Attention! Medium danger

【ATTENTION】 -- Attention! Danger!

【FORBIDDEN】 -- Do not do this dangerous operation

【REMIND】 -- Take care

The security information provided in this chapter is not the whole. For safe reason, please pay enough attention to all security information wherever it was marked, as well as other instruction in this manual.

1.2 Important tips of using tablet pc

1. LCD maintenance:

Don't put any heavy goods on the laptop

Please make sure that you haven't put too many things in the bag or besides the device when using suitcase or backpack

Don't grasp, twist or impact the surface of the LCD

Don't put LCD in environment beyond 40 degree or humidity over 90%

Don't expose LCD in the direct sunlight or strong fluorescent

Please don't use corrosive cleaning agent to clean LCD to avoid any damage.

2. Please do not block ventilating radiator to avoid device over heat.

3. Please don't remove them when system is reading floppy drive, CD drive or U disk etc, or system would be collapsed, even all your datas would lose.

4. Please don't take the case apart when the system is working or datas would be damaged, even lost. Please copy those important files by yourself timely, especially, before you decide to format the disks.

5. Reformat the HDD will delete all date on it, please backup frist. Be sure your important date have backed up in other storage media, Data loss caused by no-backup the company will not assume responsibility.

6. Please use the power adapter according to the safe usage rules. Do not take the

adapter apart.

7. Do please only use the power adapter we enclosed in the device package.

8. Make sure the computer work in normal environment, make sure computer away from the harsh environment (high-temperature, low temperature, high humidity) to ensure that the life fo the computer.

9. Do not use MODEN, ADAPTER in lightning weather.

10. Do not pick-and-place Tablet PC with one hand or make it imbalance.

11. Only the authorized people of our agency can assemble or disassemble the device, please prevent the seal from any damage for after-sales service.

12. Do please remember the password if any, and please turn to agency for help if you forget your password, but all your datas may be lost after the retrieval.

13. Please just open the CD drive manually, but not recur to any other fragile things.

14. Against operate computer incorrectly.

1.3 Attention

Applicable group

【attention】

You'd better operate this device with the related basic common sense. Children only can operate it besides adult.

Working environment

【danger】

content	Available range	remarks
Storage & transportation temperature	-20°C to 60°C	
relative storage & transportation humidity	10% - 90%RH (60°C)	
atmospheric pressure	86 kPa – 106 kPa	
power	110~240VAC , 50~60Hz	
working humidity	30% - 90%	
working temperature	5°C - 35°C	

【warning】

To avoid computer damaged by environment (humidity, dust, food, liquid, direct

exposure in the sunlight). It should be placed in ventilation, dry place.

To avoid magnetic interference and damage please keep away from other home appliances such as TV, air conditioner and so on.

Please don't splash liquids or other debris into the computer or it would cause the short circuit of other internal components and get electric shock or fire.

【attention】

Please make sure that the laptop has been placed under 10 degree or above for at least 2 hours, or when turning on, that would damage your datas.

Before usage**【warning】**

After a transportation below 10 degree, please at least wait for 2 hours under normal temperature before your usage. And do not unfold the package during this period.

【attention】

Before using, please make sure the comptuer connection, power supply and other matters all under the manual instruction.

Move, Transportation,Storage**【attention】**

Please be attention to lightly take and put when moving computer
Computer should be put in the package case and put according to the package storage logo, also use close carton to carry .
Please keep the package beyond children's touch.

【attention】

Do please change the battery under professional staffs' instruction; only use the battery manufacturer recommends; appropriately dispose the used battery.

1.4 Important tips of using batteries

New battery:

Please charge the battery only after completely used out.

Battery life :

Improper use and maintenance may shorten battery life. Please make the battery used out and re-charged fully once per 30 days.

Save battery power :

A. advanced power management

Your laptop has function of advanced power management ,which could slow down CPU and surrounding parts speed .Using these functions would help save power

B. LCD brightness

LCD would consume a lot of power,you can save the power by reducing the brightness.

C. software and peripherals

For different software and peripherals, even these are not procedure or equipment in use, it would consume power. To save power, we advise the followings:

- If you don't use Modem or other communication procedure, please shut down these .
- Take the PC card out after used it, it is a power consumer.
- Remove all unnecessary peripherals away.

Q & A :

How to make the battery used out?

Support the laptop via battery till it turns off automatically. Do not do it manually even there is any sound or notice for low power.

How to charge completely?

When the battery is charging, usually you must wait till the battery light displaying on the computer shows it is completely charged, then the charger is full. Please refer to the power indicator light of this handbook for detail information.

How to maintain battery?

At least every 30days or after incomplete discharging every 20 times ,then do one completely charge or discharge.

Special attention:

This battery is only for this laptop

If changing improper battery type, this may be in danger of explosion .It is only allowed to use the same model of factory battery or same grade of battery type recommended and admitted by factory to change.

Please don't dismantle battery.

Please don't expose battery in fire or water.

To prevent fire ,burning or battery broken, please don't let the battery pole touch metal goods.

Please be specially careful on handling broken or leakage battery. If you touch the battery fluid carelessly, please hurry to wash by soap and water. If you touch eyes, please wash them with water within 15 minutes and go to hospital as soon as possible.

If the environment temperature is pretty high ,please don't charge.

Please don't expose the battery in high temperature when storage.

Power

【danger】

If you need qualified grounding power plug and socket of three core with ground connection, the plug would be finally in the good grounding power. The good ground connecting would be important guarantee for your computer to run normally. If you change the standard of power line without authorization, it may bring serious result and the max length of the power line shouldn't be over 4.5 meter.

You should be accord to power plug and socket description to make sure power meets computer use requirement when you use the power, qualified power and good grounding connection is important guarantee for computer to run normally or it would bring serious results.

【danger】

If using products during thunderstorm, this may be harmful to computer, even yourself and other property safety .So don't use computer in thunderstorm weather and cut off phone line ,net line ,power line and other possible electrical conductor connecting outside world .Don't plug these cables when thunder.

【warning】

Don't try to plug the 110V power line in the 220V power and also don't change voltage selector switch of machine power .Any change may lead to person damage or equipment broken.

【attention】

Check carefully AC power line the machine provide randomly ,if there is problem, please contact seller.

The power line for microcomputer must accord to the following security rules:

- **CCC approval** □
- **Power plug should be finally in good power**
- **Power plug should be conform to GB 1002 - 1996、GB2099.1-1996**

Ergonomics

【warning】

When you work or play games on computer ,please adjust your environment , make your computer equipment good and let you in a comfortable ,flexible state .The following advice could help you get a more comfortable environment .

1. Support your back:

- Choose a chair supporting the lower back.

- Adjust working posture, face height and chair ,let it appear a comfortable and natural pose.

2. Contributed to a comfortable leg posture:

- Clean goods under the desk and let leg position and movement more comfortable.
- If your leg couldn't break on the floor comfortably, please use a stool.

3. Reduce the bending and reverse of the neck:

- Put LCD in the middle of your front .If you are checking file more often than screen ,please consider putting the file in front of yourself and LCD is close to the edge a little bit.
- Consider to use file framework, let the file close the level of the eyes.
- Put the top of the screen on the level of close eyes .Astigmatism may need to put the LCD lower or discuss with qualified health expert about glasses suitable for computer work.

4. Reduce eye strain:

- Put the LCD in the place of arm length and comfortably sit in front of LCD.
- Avoid glare .LCD should be placed far away from glare light or use curtain to control light intensity.
- Please remember to clean LCD .If you wear glasses and need to clean glasses.
- Please adjust the LCD light ,contrast and characterize to a state you feel comfortable.
- when operating keyboard and touchpad ,please touch key lightly,keep hand and finger relax and touch keyboard with smaller effort.
- When clicking touchpad or using joystick or game controller ,use smaller effort to touch the key.
- When typing ,avoid rest on the surface of wide angle objects with palm or wrist,if necessary .Please break your palm when typing.
- Relax arms and hands when not typing, dont rest on the edge of the objects like desk edge.
- Adjust your chair and don't let seat squeeze the back of the knee.

1.5 Safety tips

1. Power outlet hole should be placed closed to equipment or place easily to be operated .When plugging the power line,avoid direct way of pulling out .Be sure to pull from the plug to ensure safety and be aware of electric shock.Please don't open power adapter.
2. Please don't put the goods closed to the water.
3. When installing ,Please put the goods in the stable structure.The goods may drop because of not stable place and lead to serious damage .

4. Please don't put the cable of the products in the place of people coming and going to avoid bad step on electric wires .Please don't put any goods on the electrical line.
5. Please follow all warning information and label on the goods.
6. If you don't plan to use the goods for long time ,please pull the power plug to avoid damage from short-term excessive voltage
7. Please don't spread any liquid on the goods .This action may cause risk of fire or electric shock.
8. If any following situation happens ,please hand to professional people to serve
 - a. When electric line or plug has been damaged or worn
 - b. Liquid is spread on the goods
 - c. The goods has been subjected to rain or spilled water
 - d. When you have run as instruction and this products is not operated normally
 - e. If the goods dropped ever or shell has been damaged
 - f. If the goods appear obvious damage
9. The use of the goods and storage temperature refer to attached product specification. Don't use and memorize in the stated temperature. This may lead to products permanent damage
10. Please don't use power adpater next to water or other liquid place .Don't spill liquid on the power adapter

Note: All pictures of the handbook are schematic for reference only .Details are subject to actual goods.

2 product description

2.1 brief introduction

- Product name: Tablet-PC
- Serial and model: Tablet-PC serials Mini model
- Product function feature

Using latest Intel mobile computer technology.

System scalability

System allow memory and HDD capacity upgrade and replace .Please refer to local reseller or designated maintenance department for operation when doing replacement of memory expanded.

Clear LCD

The Tablet-PC should have LCD display of LED backlit. This would bring clear and bright colorful characters and pictures.

Communication feature

- 1.The Tablet-PC prepares wireless solution of 802.11b/g built in for LAN.
- 2.The Tablet-PC can built in EVDO 3G module, 3G and Bluetooth are optional.

2.2 components introduction

(Note : Following are schematic diagram and subject to actual goods)

17

序号	组件	说明
1	Power Swicth	The master switch of Tablet pc
2	Speakers	Built-in speaker
3	PC camera	Built-in camera
4	Display/Touch screen	Show the touch region
5	External power	Connect the power adapter
6	RJ-45 port	Connect reticle
7	VGA port	Connect display
8	USB port	Connect USB device, such as printers,digital cameras,etc.
9	Audio out	Audio output and 2.1 sound effect pre-out, headset, active loudspeaker can be connected
10	Microphone jack	Connect microphone
11	Wifi LED	Num lock indicating wifi is open
12	HDD LED	HDD LED will blinking as power on
13	Battery indicator	LED on when Battery using and in charging state
14	Power indicator	LED on when power-on

15	Card Reader	Can insert SD/MMC/MS/MS PRO card, to extend computer functions
16	Cooling fan	Air outlet of cooling fan
17	Written pen	Write pen Placement Location
18	Microphone	Built-in microphone

SPECIAL NOTICE

Do not hit LCD screen with any hard object for protect LCD screen. Do not use any corrosive detergent in case of damage screen, Only designated LCD cleanser can be used for screen cleaning and maintenance.

Make sure the cooling vent is unblocke in order to prevent pc

2.3 Open the box and check

Please be careful to open the box, take out of machine and other accessories. If you find something damaged or missed, please contact seller immediately. Please keep original packing materials for replacement.

Normally you would find following components(please refer to packing list for details)

1. tablet pc
2. Power adapter (including 1 power cable)
3. User manual
4. Drive
5. Warranty card
- 6 . Loading list

3 Basic information

3.1 System status indicator light

LED Graphic symbol	contect
	Power on/off
	Flashing orange light means the battery is under charging when system is charged by battery but battery power is low . Blue light means battery is fully charged
	Blue light means system is storing CD or HDD

	Blue light flashing means wireless card now is connected
---	--

Stop computer

When you finish work , you could power off computer or let computer enter into waiting or sleeping mode

stop mode	Way	Power on again and use
power off directly	Please follow the power off procedure of operating system. This could avoid data lost or software broken. in case system is dead coz of hardware or software, then turn it off by press power button.	press power button
(Standby)	As your windows setting : entering standby status as following method <ul style="list-style-type: none"> • Close computer cover • Press power button 	press power button
(Hibernation)	As your windows setting,entering sleeping status as following way <ul style="list-style-type: none"> • Close computer cover • Use power button 	press power button

If you stop computer as waiting or sleeping status, then when using computer next time it would return to the last status.

3.2 Screen

To make your eyes comfortably, we adopt TFT LED screen for the computer.It support high resolution true color, can bring you extraordinary visual. Further more, there is high-sensitivity touch screen, support handwriting input.

Please follow below rules for extending the life of display

1. Set LCD brightness as lowest comfortable brightness
2. Please add a external LCD and close laptop screen when using on desk
3. Don't close power system to enter into pause mode.
4. If using DC power but without adding a external LCD ,don't switch to pause mode when not use

【attention】 To extend your battery life ,please adjust brightness to the lowest on premise of watching comfortably for saving power.

3.3 Network card

There is a built-in Ethernet card in the device, it can meet 10/100Base-TX standard. Plug the one end of LAN to your right connection RJ-45 of your computer ,then you could transfer data on line here .

Open / close **wireless network**

Your computer builds in wireless card, please set and join as operation system indication (please consult with your local networker). And please notice your computer need to connect with wireles network in certain time.

4 BIOS(basic input and output system) Settings

In this chapter, we will instruct you enter BIOS to setup procedures and various kinds of hardware settings. You could learn how to use the built-in security protection settings.

[public setting procedure] is a hardware status procedure built in laptop BIOS. It could carry out and maintain many hardward functions. It is a kind of software by making use of menu mode to operate ,allowing you to set and change settings easily

BIOS includes pre laptop factory settings.however you still have chance to change BIOS pre-settings. When there is hardware changes, such as upgrade, temporary status or you decide to set hardware

BIOS could let you set password for controlling user storage, this is important function because present laptop stores a lot of information. Storage without authorization could be prevented

4.1 Method of BIOS Setup

The situation which you must carry out the BIOS setup includes :

Display shows information to require you carry out BIOS settings when power tests and finds problem.

You need to reset the default value.

You need to change default value upon certain hardware.

You need to change default value to get the best system function.

If you plan to do the BIOS setup. You need to press Delete key when powering on the computer.

how to select

To one item, you need to finish setup by 2 or 3 steps. Most of these options must pass 3 steps. Menu titles, drop-down menu and sub-menu.

Making use of the keyboard to move and select. You can see keyboard information on the right bottom of the screen.

keys function in the system setting

【Enter】 : choose the current items or enter sub-menu

【↑↓】 : choose options or date

【←→】 : choose menu **【+/-】** : change device

【Esc】 : close the current page for removing the former page

【F1】 : help

【F10】 : save and exit the system setting.

Notice:

Do not change the pre setting of the BIOS. Or else this will cause the system unstable or can't work normally. If there's any problems when setting, please recover default setting.

The following picture, due to the different configuration, the BIOS content in the following picture may be different from the actual machine, please take the actual machine for reference..

4.2 Main settings

ITEMS	DESCRIPTION
System Time	Time setting
System Date	Date setting

4.3 BOOT (setup of boot screen and boot device order)

OPTION	INSTRUCTIONS
Boot Device Priority	Start prior setup for choosing or selecting order

4.4 Security Settings

OPTION	INSTRUCTIONS
Change Supervisor Password	Set BIOS password, to protect BIOS Security.
Change User Password	setting or change users' password.
Clear User Password	clear users' password.

Special Tips

Please do not forget your setting password, because this is the only password to set up the BIOS. or else please contact with supplier or authorized maintenance station. However this may destroy all the stored data.

4.5 [Exit] Menu

ITEM
Save Changes and Exit
Discard Changes and Exit
Load Optimal Defaults

Note: Advance setting item, suggest users not revising, or revise under the guide of the professional man.

5 Drivers Installation and User instruction

In the chapter,you will know how to use the enclosed CD Installation Driver. One CD Driver will be enclosed when shipping the laptops,there is corresponded driver in the CD.

The chapter will instruct you how to install these drivers.

5.1 Install drivers,pls follow below steps:

The laptop supports: Windows XP SP2,Vista , Mini OS(Customized)

Open the CD Driver enclosed,as showed below:

“Chipset”is the chipset group driver of the laptop:

“Video” is video driver

“Audio” is audio driver

“Wi-Fi” is WIFI driver

Click correspondent icons, then follow the clews to finish the installation.

6 Malfunction Analysis and Disposal

In the chapter, you will know how to solve the common hardware and software problems.

Tablet pc must be tested very strictly before the shipment, it accords to law requirement and general system requirement.

The chapter provides reference and distinguished information for the hardware and software problems you will encounter normally.

When you encounter such problems, you can try to deal with according to the instruction of the chapter, if mistake still exists, you can enquire about the service information from your franchiser.

6.1 Sound Problem

No Sound

- Ensure the correct installation of the sound and audio drivers, you can check, my computer/management (click right key)/device management to check audio device driver state (can't appear)
- Pls click the loudhailer icon in the right down corner, check the volume of the loudhailer whether be closed or not (or open the control through menu, start mene/control panel/sound, voice, sound effect device.
- Pls try to press Fn+F9 to improve the volume (confirm whether the volume be adjusted the minimal state.)
- Most sound problems are related with software. If the sound of your laptop is normal, the possible reason is that the settings of the software is incorrect.
Can't record

Pls double click the loudhailer icon in the right down corner to check whether the volume of the microphone closed or not.

1. Press once 「option」, choose 「property」.

2. choose 「record」 press once 「ok」.

3. press 「ok」 once again, the recording volume controller will skip automatically.

6.2 Hard disk problem.

Hardisk is unable to work or undistinguishable.

If you upgrade the hard disk just now, pls ensure the interface of the hard disk is not loose and doff, and the posting of the hard disk is completely

- correct. You can plug out the tie and plug again, then restart the laptop. (tie touch problem is possible to cause the system can't recognize the hard disk device.)
New hard disk need be seperated into new partitions and formatted again.
Operation system and drivers also need install again.

Pls check the denoting light of the hard disk,when you save the file,the hard disk light will be clittered intermittently.

New hard disk is possible bad.

- If your tablet pc encountered static orimpinge,you may damage the hard disk.

The performing speed of the hard disk is too slow

- If your HDD run for a long time, messed files would cause many disk debris sorting procedure. Please choose [Start-Appendix-System tool-Disk debris cleaning] to clean up the disk compiles. This takes you some time.
- Your HDD is infected virus. Please install anti-virus software.
- You maybe installed so many procedures which make the system works slowly.

File damaged

- Please run [Disk scan procedure] to scan the disk firstly, double click [my laptop], right click C:, select [Attribution], then in [tool] bar in error checking status to run the scanning procedure.

6.3 LCD problem

When system boot, screen is black.

- Check the battery is OK, after power on, every of the light indicating lights are OK, then to get the information it is the screen or system device's problem.
- Please make sure the laptop is not under sleeping or waiting model. Under these modes, the LCD is closed for saving power.
- Please press function key to increase LCD brightness.
- Please press function key to make sure laptop is not under the CRT output mode only.

Not easy to read words on screen

- Please press function key to increase screen brightness.
- The screen resolution should be 1024*600 to get the best effect.
 1. [Start]-Setting-Control panel-double click [Display] icon.
 2. In the page of [Setting], please set resolution as 1024*600.

Screen flashes

- When power on or off the device, you would see the screen flashes many times which is a normal phenomena.

Dead dots on screen

- Since LCD manufacturing process limitation, LCD usually appear some points which couldn't display some color normally (dead points called generally). This is normal phenomona. Please be assured of using .Please refer to China national standard GB/T9813-2000. Following is reference National content.
- Attached C LCD dead points acceptable standard
- test as following condition :

environment temperature : 20°C~25°C

light : 300 lx~700 lx

Visual distance : 35cm

Visual point of view: sight line and screen surface is 90 degree

6.4 memory problem

After you install more memory, POSTing power on self test don't show adding memory capacity

- Memory installing may be not proper
- Memory is broken
- Your system may be not compatible with come memory

Operation system would send out error information of low memory when working

- This usually is the software or Window problem
- Pleaes close application software which is not in use and reboot computer
- Or you must install more memory module

Spetial statement

This laptop could support various kinds of peripherals such as mouse, keyboard, printer, scanner. We make sure the peripherals compatibility and reliability along with machine. User should use it properly as attached product description book. If consumers purchase third party peripherals and use in this laptop, please follow this equipment description book, connect peripherals and computers properly and install related driver which the equipment operation system support. Since peripherals factory in market is too many, to make sure the consumers' interest ,we advise consumers to purchase famous goods which quality could be assured. If there is compatible problem between third party and laptop, Please contact third party factory.

For the software along with laptop(All software installed randon are random given software, it is free for user). We are sure of the software function and compatibility. Please refer to user manual along with machine to use it properly. Beside there are various software in the market, unless the software has spetial requirement, most genuine software could be run normally in this laptop. To protect consumer interest, please purchase genuine software from legal channel. If user purchase third party software, Please follow use manual along with software to operate properly. If third party has compatibility problem with laptop ,please contact third party.

We advise before purchasing third party hardware products or software, usercould find third party factory or reseller to test ,and purchase it after test pass to protect your right. We don't assure supporting return and replacement because hardware products or

software problem from third party .We could offer technical support.

Appendix A: Spec

CPU: Intel Atom Mobile N270, 1.6G FSB533(BGA)

Chipset : Intel 945GSE+ICH7-M

Display: 10.2"TFT LCD panel touch screen (1024×600)

RAM: DDR2 667/533 MHz memory, one DDR2 SO-DIMM slot (support 512M/1G/2G).

Graphic memory: dynamic graphic memory distribute: MAX RAM 1024MB;MAX Graphic memory 128MB.

Storage: SD/MS/MMC/MS-pro

HDD: 2.5", height: 9.5mm, SATA port, support 160GB

Slots: 1×DIMM

2×Mini PCI-E slots: one for WIFI&Bluetooth module or WIFI only, 2nd for 3G/3.5G HSDPA/WCDMA card (Optional)

Sound: High definition Audio support 2.1 channel output

2 Audio jacks

3 USB 2.0 ports

1 VGA port

1 Headphone jack

1 Microphone jack

PC camera: 1.3 Mega Pixels

I/O port:

1 MIC port;

1 earphone hole;

3 USB2.0 ports;

1 VGA port;

1 network port(RJ-45);

1 card reader (SD/MS/MMC/MS-pro);

1 DC-IN port

LAN: 10/100 M Ethernet Controller.

Wi-Fi: IEEE 802.11b/g

Power: Adapter: Input: 100-240V 50/60Hz Max 1.0A Output: 12V / 2.5A

Battery: Polymer battery, 2400mAh, 1.5h battery life

Size: 280mm(W)×180mm(D)×24mm(H)

Weight: 1.03KG (with battery)

Note : we won't announce you specially if there is any change of the device in the future.
